Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Times B is a Japanese parking-sharing and reservation marketplace operated by Times24 Co., Ltd. within the Park24 Group. It enables drivers to find and reserve parking nationwide while allowing space owners to monetize unused parking capacity through a managed service.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent marketplace, customer-support, registration, review, and policy structure, while technical behavior showed no phishing, wallet-drainer, hidden-form, or sensitive-form indicators. External reputation checks found no malicious or suspicious detections, and the site is not associated with a confirmed blacklist.

EVIDENCE

- The homepage describes parking reservations, owner registration, reviews, support, and terms without identified red flags.
- Behavioral testing recorded no wallet activity, hidden forms, external password forms, cloaking, or suspicious inline scripts.
- The domain was first archived on 2008-09-20 and has 220 snapshots across 19 tracked years.

Regulatory Verification Notes

The site provides user guidance, support information, registration pathways, and terms and policy links, but the supplied content does not identify a licensing authority or license number. This is a limited disclosure point for regulatory verification, not evidence of deceptive conduct. No relevant third-party broker match was identified.

EVIDENCE

- The homepage links to usage guidance, support, contact facilities, and a terms index.
- Hosted on AS20940 (Akamai International B.V., NL).
- TLS certificate issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1, with OV validation for PARK24 Co., Ltd., valid to 2026-10-16.

What to Verify Next

For formal procurement or higher-value commercial use, confirm the Times24/Park24 operating relationship through an independently sourced corporate channel and review the applicable terms, cancellation provisions, and service responsibilities. Where institutional policy requires it, confirm whether the service is subject to any sector-specific registration requirements.

EVIDENCE

- The homepage identifies Times24 and links to Park24 Group services.
- The homepage provides reservation, account, support, and terms pathways relevant to operational review.
- The owner-facing section describes registration and monetization of unused parking spaces.

Summary Verdict

The overall posture is legitimate, established, and high trust. The available evidence supports normal interaction, including account login and standard service use, with no observed indicators of impersonation, phishing, or malicious activity.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than exposed origin infrastructure. This provides a meaningful defensive layer, although protective hosting remains a mitigating technical signal rather than proof of legitimacy.

Closing Assessment

Normal account login and standard service use are appropriate, subject to ordinary review of transaction terms and applicable organizational requirements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of btimes.jp.

- The request stayed on btimes.jp. It was not redirected to another domain. CLEAR

- The earliest public archive of this site is from 2008-09-20. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about btimes.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
