

Is budapest-holidays.com safe? TrustSniffer's moderate-trust assessment: 65/100

budapest-holidays.com

Verdict

65
OUT OF 100

MODERATE TRUST

budapest-holidays.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Travel aggregator/booking portal (dein-reisebuero.com / budapest-holidays.com) listing hotels, flights, cars and activities. The site describes itself as a technology provider (Bigmedia24 Dynamics Ltd.) and directs bookings to partner providers; includes search and contact features and standard cookie/analytics notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What budapest-holidays.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a travel technology and booking aggregator presenting hotel searches, destinations, flight deals, rental cars, activities, tickets, and travel guides. It describes itself as a technology provider associated with Bigmedia24 Dynamics Ltd., directs bookings to selected partner providers rather than acting as the underlying travel supplier, and appears to monetize through affiliate or referral relationships.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, malicious-content, or conflicting-identity signals were observed. The homepage presents a coherent travel-marketplace model, with hotel availability, accommodation comparisons, partner-directed booking flows, and support functionality; its content contains no reported fraud indicators or credential-harvesting forms. The principal limitation is provenance rather than an observed contradiction: the website's connection to a verified real-world operator remains unconfirmed, so the apparent legitimacy of the service should not be treated as independently proven.

EVIDENCE

- The homepage identifies the service as a travel technology platform and states that bookings continue through selected travel partners.
- The homepage offers hotel search, destination pages, flight deals, rental cars, activities and tickets, and travel guides without presenting a login or password-collection form.
- The domain was registered on 2024-05-23 and is approximately 2.24 years old; historical records span 2024-05-23 through 2025-07-11, covering 2 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; coverage was partial.

Regulatory Verification Notes

The site's stated role as a technology provider and booking intermediary is materially clearer than a claim to be the hotel, airline, car-rental company, or activity operator. However, the legal and governance disclosures do not independently establish the operating entity, and no license, registration number, or regulatory authority was identified in the supplied website evidence. That is a transparency and verification gap, not evidence of a scam. The available third-party broker context produced no matching result and should be treated only as limited reputational context, not as a licensing determination.

EVIDENCE

- The homepage describes the business as a technology provider rather than the actual travel-service provider.
- The homepage and booking presentation refer to selected partner providers and affiliate or referral-style arrangements.
- The site's on-page licensing and registration disclosure state is unclear; no license authority or license number was identified.
- The website is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE; its TLS certificate uses DV validation, was issued by YE2, and is valid through 2026-10-28.

What to Verify Next

Before a high-value booking or disclosure of sensitive information, independently confirm the legal operator named in the site's legal and contact materials, establish which partner will actually process the reservation and payment, and review the partner's cancellation, refund, and dispute arrangements. Licensing or registration should be checked with the relevant jurisdictional registry if the operator represents itself as providing regulated travel or payment services. Contact channels should also be confirmed through an independent, offline route before relying on support for a material transaction.

EVIDENCE

- The homepage provides a travel-support telephone channel and a contact or chat form.
- The booking flow distinguishes the platform from the selected travel partners that provide the underlying services.
- The homepage includes search and contact forms, with no sensitive form detected in the supplied interaction analysis.

Summary Verdict

The website presents as an apparently legitimate, moderate-trust travel marketplace with a coherent commercial purpose and no observed scam or impersonation contradictions. Its principal risk posture reflects limited independent confirmation of the operating entity and the intermediary nature of the service, rather than evidence of active malicious activity.

Infrastructure Integrity

The site benefits from CDN/WAF protection, with observed traffic associated with the CDN edge address 135.181.221.94 on AS24940 operated by Hetzner Online GmbH; the origin server was not observable. This reduces direct exposure of the origin infrastructure and supports transport and perimeter resilience, but it is a mitigating technical control rather than proof of business legitimacy.

Closing Assessment

Ordinary browsing and routine travel research are proportionate uses, while sensitive or high-value transactions should proceed only after the operator, booking counterparty, payment protections, and refund arrangements have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- The page sent data to a destination TrustSniffer does not recognise.
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of budapest-holidays.com.

- The request stayed on budapest-holidays.com. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by serverpro24.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-23. NOTED
- The earliest public archive of this site is from 2024-05-23. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about budapest-holidays.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
