

Is buffalorainsnetwork.com a scam? TrustSniffer's high-risk assessment: 0/100

buffalorainsnetwork.com

Verdict

0

OUT OF 100

CRITICAL RISK

buffalorainsnetwork.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Promotional site content for 'love777 game', an online gambling/casino platform focused on offering a wide range of games (slots, live casino) and a seamless user experience in 2026. The page markets entertainment and earning potential but does not present verifiable licensing, corporate identity, or transparent financial flow details in the provided content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://buffalorainsnetwork.com/>

What buffalorainsnetwork.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as “love777 game,” an online gambling and casino portal offering slots, live casino games, varied betting formats, promotions, registration, and the prospect of earning through continued play. Its apparent business model depends on attracting users to create accounts and deposit funds before participating in gambling activities.

Scam/Impersonation Risk

Confirmed external contradictions make this a high-risk site for sensitive interaction. External reputation checks recorded 11 malicious detections and one suspicious detection, including detections from Fortinet and Sophos, and the domain is recorded as blacklisted by two sources. This aligns with the homepage’s deposit-before-service model, aggressive claims about making money, unsupported safety and performance assertions,

and opaque explanations of how user funds flow. No separate brand-impersonation or phishing determination was recorded, but the combination of confirmed blacklist status and malicious detections is sufficient to outweigh the site's stable technical presentation. The technical registration record and historical archive record also require explanation because they place the current registration in 2026 while archived site presence extends from 2013 through 2024.

EVIDENCE

- External reputation telemetry recorded 11 malicious detections and 1 suspicious detection; Fortinet and Sophos were among the flagged vendors, and blacklist status was recorded by 2 sources.
- The homepage promotes slots, live casino, registration, deposits, and potential earnings while providing no substantiation for its financial or safety claims.
- Domain registration telemetry: Registered 2026 (~0.32 years old).
- Archive telemetry records 30 snapshots spanning 2013–2024 (12 years tracked).

Regulatory Verification Notes

The homepage presents a gambling service but does not provide verifiable licensing details, a corporate operator identity, or transparent financial-flow information in the supplied content. These are material regulatory and disclosure gaps for a platform that solicits deposits; they do not independently establish fraud, but they prevent reliable confirmation that the service is authorised or accountable. No match was recorded in the available broker-reputation dataset, which is only contextual and does not constitute licensing evidence. The site's transport security and hosting arrangement are technically identifiable, but those controls do not validate the operator or its regulatory status.

EVIDENCE

- The homepage contains no verifiable gambling licence, licence number, corporate registration detail, or clearly identified operating entity.
- The site's hosting telemetry identifies AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by YE2 at DV validation level and is valid to 2026-09-25T08:10:17+00:00.
- The page is a gambling/casino landing article whose stated mechanics require registration and deposits before service delivery.

What to Verify Next

Before any sensitive interaction, an independent check should establish the legal operator and confirm any applicable gambling licence directly with the relevant regulator's public register. The proposed deposit, withdrawal, refund, dispute, age-verification, and jurisdiction terms should be obtained and assessed before funds are transferred. Contact channels should be confirmed through an independently sourced route, and payment providers should be checked for buyer protection, chargeback availability, and the exact merchant descriptor that would appear on a transaction.

EVIDENCE

- The homepage supplies the service proposition but not independently verifiable operator or licensing credentials.
- The homepage's deposit-led gambling model makes withdrawal, refund, and dispute terms directly relevant to pre-engagement review.
- The available page analysis found no login form or sensitive form during capture, so the principal concern is prospective account, credential, and financial interaction rather than a confirmed captured submission.

Summary Verdict

The overall posture is critical, with a confirmed sensitive-interaction risk and an unverified real-world operator identity. The available evidence does not support treating the site as a trustworthy venue for account, credential, or financial activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were Cloudflare edge servers on AS13335; the origin server was not observable in this analysis. This provides a mitigating layer against direct exposure of the hosting environment, but it is a shared protective service and is not evidence of operator legitimacy.

Closing Assessment

Prospective users should limit activity to passive viewing and should not register, log in, submit credentials, deposit funds, or provide financial information unless the operator, authorisation, and payment protections have first been independently established.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of buffalorainsnetwork.com.

- The request stayed on buffalorainsnetwork.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-26. NOTED
- The earliest public archive of this site is from 2013-05-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about buffalorainsnetwork.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
