Full analysis

Overview

Buletin TV3 Malaysia is an established Malaysian news portal operated by REV Media Group within Media Prima Group, presenting current affairs, politics, crime and courts, international news, sports, entertainment, lifestyle coverage, video news, and podcasts through an advertising- and media-supported publishing model.

Scam/Impersonation Risk

No contradictions were observed across the homepage content, technical checks, reputation signals, and historical continuity. The homepage presents coherent public-interest journalism, contains no login or sensitive-data forms, and shows no phishing, credential-harvesting, deceptive financial, or brand-impersonation indicators. The site therefore presents no evidence of scam or impersonation activity.

- The homepage is identified as “BULETIN TV3 Malaysia” and contains substantial current-affairs, national, crime, sports, entertainment, video, and podcast content.
- The domain was registered in 2019 and is approximately 7.52 years old.
- Historical records contain 129 snapshots spanning 2019–2026, with 8 years tracked.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site's apparent activity is journalism and media publishing rather than a regulated financial service, so no financial licence claim is expected from the supplied homepage evidence. The published identity is consistent with an established media operation, and no conflicting legal identity appears. Licensing or corporate-registration details are not evident in the supplied page material; this is a limited disclosure point for institutional records, not evidence of illegitimacy. The named registrar and established technical footprint further support continuity.

- The homepage describes a mainstream news publisher operated by REV Media Group and associated with Media Prima Group.
- The domain registrar is Rafatech System Sdn Bhd; the recorded organization is Media Prima Berhad.
- The site is hosted on AS396982, Google Cloud Platform—Google LLC, US.
- TLS is issued by WR3 using domain validation (DV), valid through 2026-10-24 09:45:54 UTC.

What to Verify Next

For formal onboarding, an institution may independently confirm the current corporate attribution through Media Prima or REV Media Group’s established corporate channels and retain the relevant legal or licensing position in its records. Routine contact-channel validation and ordinary vendor due diligence remain appropriate for enterprise use.

- The homepage provides the operator and group attribution used for identity verification.
- The supplied page evidence shows no sensitive forms, login forms, or untrusted form destinations.
- The site's historical activity remains continuous through July 2026.

Summary Verdict

The site has an established, legitimate, and trustworthy posture, supported by convergent identity, content, reputation, historical, and technical evidence. No scam, impersonation, or phishing contradiction was identified.

Infrastructure Integrity

The site has no detected CDN edge or WAF vendor and resolves to an identifiable Google Cloud hosting environment with a likely origin address. This provides a clear hosting context and is a mitigating infrastructure signal, although hosting infrastructure alone does not establish legitimacy.

Closing Assessment

Normal browsing, account login where offered, and standard site interaction are appropriate within ordinary organizational security and content-governance controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about buletintv3.my at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
