

Is bumcoinc.site safe? TrustSniffer's low-trust assessment: 26/100

bumcoinc.site

Verdict

26

OUT OF 100

LOW TRUST

bumcoinc.site is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-30 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'coming soon'/parked landing page for bumcoinc.site showing registration success and hosting provider (HOSTAFRICA) promotional text. No forms, no login, no transactions, no claims of earnings.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://bumcoinc.site/>

What bumcoinc.site served when TrustSniffer captured it on 2026-09-30. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

bumcoinc.site is a parked “coming soon” domain displaying a registration-success message and promotional HOSTAFRICA hosting content. It presents no active product, service, financial offering, login function, transaction flow, or earnings claim; its apparent purpose is to reserve the domain pending future development.

Scam/Impersonation Risk

The site is subject to a **confirmed external blacklisting** and multiple malicious or suspicious detections, which is the principal reason for the elevated risk posture. The homepage itself is only a placeholder and does not currently present a phishing form, login interface, payment request, transaction mechanism, or brand-impersonation claim; therefore, the available page content does not establish an active phishing operation, but it does not offset the external threat findings. The operator’s identity is also not independently verified. A contact-channel integrity anomaly is present in the available findings: the published address is malformed and could represent a deliverability-breaking typo or a possible typosquat.

EVIDENCE

- The homepage is classified as a parked “Website coming soon” page and contains no forms, login fields, sensitive-input fields, or transactions.
- External reputation checks recorded 2 malicious detections and 1 suspicious detection, including a tier-one threat detection.
- The domain is recorded as blacklisted by external sources; the page itself contains no identified brand-impersonation content.

Regulatory Verification Notes

The site makes no licensing, registration, corporate-entity, or regulated-service disclosure. Because the only observed content is a hosting-provider placeholder, this is a material verification gap rather than evidence of a specific regulated business operating unlawfully. The page provides no basis for independently connecting the domain to a verified legal entity, and any future financial, commercial, or user-facing service would require separate confirmation of the operator and applicable authorization.

EVIDENCE

- The homepage states that the domain has been registered and is under development but identifies no operating company or legal entity.
- Domain registration records show registration on 2025-11-16, approximately 0.87 years ago, through NameCheap, Inc.
- The site is hosted on AS329184, Host Africa (Pty) Ltd; its TLS certificate is issued by YE2 at DV validation level and is valid through 2026-12-24.

What to Verify Next

Before any future version of the site is treated as an operational service, the proposed operator should be matched to an independently verifiable company record and, where relevant, confirmed against the appropriate licensing register. Any future payment, credential, download, or account-registration workflow should be assessed only after the domain’s external reputation status has been resolved and official contact channels have been confirmed through an independent route.

EVIDENCE

- The current homepage provides no legal-entity, licensing, or service disclosures against which an operator can be validated.
- The current page exposes no login, payment, or transaction workflow; any later addition of such functionality would materially change the interaction risk.

Summary Verdict

The overall posture is low trust with a high level of concern for sensitive interaction. The available evidence supports treating the domain as an unverified and potentially compromised or problematic web property rather than as an established service.

Infrastructure Integrity

The domain resolves directly to infrastructure operated by Host Africa (Pty) Ltd in South Africa on AS329184, with no CDN detected and a likely origin IP exposed. This provides a clear hosting path but no legitimacy assurance; the valid DV certificate supports transport encryption only and does not establish operator identity or site trustworthiness.

Closing Assessment

The appropriate action is to limit interaction to passive observation and require independent identity, authorization, and reputation checks before permitting credentials, payments, downloads, or other sensitive activity.

Written analysis generated 2026-09-30 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
 - The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bumcoinc.site.

- The request stayed on bumcoinc.site. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR
- DNS for this domain is served by host-ww.net, across 4 name servers. NOTED
- The registration is paid up to 2026-11-16. NOTED
- It is hosted on Host Africa (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bumcoinc.site at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
