Full analysis

Overview

Bumi Mandiri is a Sukabumi, Indonesia-based outdoor and outbound activity provider website presenting school programs, public activities, events, facility information, testimonials, photographs, and reservation channels for a local service-booking business.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-content, or confirmed reputation warnings. The homepage has a coherent local-business presentation, including named activities, visitor testimonials, photographs, and reservation information, while behavioral testing found no login form, sensitive form, hidden form, wallet interaction, cloaking, or suspicious script activity. The site is therefore evidence-consistent with an established, apparently legitimate local service website, although the operator's real-world identity is not independently verified.

EVIDENCE

- Domain registration records show registration on 2019-10-06 and an age of approximately 6.88 years.
- Archive records contain 312 snapshots from 2021-11-28 through 2026-02-06, covering 6 years.
- The homepage returned successfully in both observed behavioral runs, with no detected phishing or brand-impersonation indicators.

Regulatory Verification Notes

The About and Contact content identifies the Bumi Mandiri service and supplies location and reservation information, but the available pages do not state a formal legal-entity name, licensing authority, or license number. For this type of local recreational service, that is a transparency and verification point rather than evidence of a scam. No matching third-party broker profile was identified; this is contextual reputational information and is not a licensing determination. Transport security is present, but a domain-validated certificate confirms encryption rather than the operator's legal identity.

EVIDENCE

- The site is hosted on AS45146, RAJASA-AS-ID-AP - PT. Raja Sepadan Abadi, ID.
- The site's TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-11-16.
- The homepage and contact content provide business and reservation details but no stated license number or licensing authority.

What to Verify Next

Before a booking or payment, independently confirm the operating entity and physical venue through an offline or independently sourced contact route. Review the applicable booking, cancellation, refund, and liability terms, and use a payment method that provides transaction protection. Credential use is not a prominent site function, but any future account or payment interaction should be limited to the official domain and confirmed support channels.

EVIDENCE

- The contact page is presented as the reservation point for the advertised services.
- The site content includes program descriptions, event material, photographs, and testimonials that can be matched against independently sourced venue information.
- Behavioral testing found no sensitive submission form or untrusted form destination.

Summary Verdict

The overall posture is **high trust and low risk**, with converging evidence consistent with an established, apparently legitimate website. This classification supports ordinary consideration of the site for its stated services, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site resolves directly to infrastructure operated by PT. Raja Sepadan Abadi in Indonesia, with no CDN or WAF identified. Direct hosting is not inherently adverse; the identified provider and stable resolution provide a

defined technical hosting context, while the absence of a protective edge layer means there is less intermediary infrastructure to mitigate exposure.

Closing Assessment

Normal browsing and routine service evaluation are proportionate, while independent business, terms, and payment-protection checks should precede credential or payment interactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bumimandirisukabumi.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
