Full analysis

Overview

This is an author and personal-brand website promoting Burke Hedges and the book **Prosumerism**, offering visitors a free chapter and audio preview in exchange for an email address, with related book sales, speaking engagements, consulting services, and a shop.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-site, or confirmed blacklist indicators, and no matching broker-reputation record was identified. The homepage presents a coherent author-promotion model rather than a deceptive financial or credential-harvesting proposition. Technical interaction testing found an email-only capture form, no login or password form, no hidden forms, no wallet activity, and no external POST submissions. Two inline scripts and some external network activity were flagged for review, but the observed behavior showed no cloaking, credential collection, clipboard manipulation, or wallet-draining activity; these are therefore limited technical anomalies rather than evidence of impersonation.

EVIDENCE

- The homepage states that *Prosumerism* is promoted by Burke Hedges and offers a free preview with an audio version.
- The homepage uses one email-capture/newsletter form; no sensitive form fields were observed.
- The domain was registered in 1997 and is approximately 28.96 years old.
- The site has 253 archive snapshots spanning 2000–2026, with 27 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate author and commerce website, but it does not independently verify the real-world operator identity. The site's apparent activities—book promotion, retail, speaking, and consulting—do not themselves indicate a regulated financial service. No license claim or registration number is presented in the supplied page findings, so the relevant verification issue is commercial and identity transparency rather than evidence of a scam. Registration privacy is an administrative detail; the positive continuity, coherent content, and clean reputation signals support the site's established appearance.

EVIDENCE

- The site is registered through GoDaddy.com, LLC; the registration record identifies Registration Private through Domains By Proxy, LLC.
- The site is served on AS40021 by CONTABO-40021 – Contabo Inc., US.
- Transport encryption uses a DV TLS certificate issued by YR2, valid through 2026-11-02.
- The About, Shop, Speaking, Consulting, and Contact pages provide a consistent author-focused business structure.

What to Verify Next

Before credential submission or payment, an independent check should confirm the commercial identity behind the Shop and any associated payment or fulfillment arrangements. The About page's biography and testimonials should be corroborated through an independent source, while the Shop should be reviewed for clear returns, refunds, and payment-protection terms. Any speaking or consulting engagement should identify the contracting entity and applicable terms, and contact channels should be validated through an independently sourced route.

EVIDENCE

- The About page contains the biography, professional claims, and testimonials requiring independent corroboration.
- The Shop page is the relevant location for seller, fulfillment, refund, and payment-protection checks.
- The Speaking and Consulting pages identify the service areas requiring contract-level identity confirmation.
- The Contact page is the appropriate location for validating official communication routes.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. No scam or impersonation contradiction was identified, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure and common web attacks. The observed address was a CDN edge address, and the origin server was not observable in this analysis; this infrastructure posture supports resilience but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent merchant-identity, contractual, return-policy, and payment-protection checks should be completed before credential or payment interactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about burkehedges.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
