

Is burwod.ru safe? TrustSniffer's low-trust assessment: 25/100

burwod.ru

Verdict

25

OUT OF 100

LOW TRUST

burwod.ru is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Commercial website for a Moscow-region well-drilling company (ООО "Бурводмонтаж") offering drilling, outfitting, water-treatment and related services, with prices, guarantees, extensive regional coverage and contact details.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What burwod.ru served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a commercial local-service site for ООО "Бурводмонтаж," presenting water-well drilling, well outfitting, water-treatment, heating, and related services across Moscow and the Moscow Region. Its apparent business model is direct contracting for residential and rural water-supply projects, supported by per-metre pricing, claimed guarantees, site visits, and document handover.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional well-drilling business, and no brand-impersonation or phishing form was identified on the pages reviewed. However, this benign presentation is outweighed by material external contradictions: the domain is blacklisted by multiple external sources, with malicious detections recorded by external reputation analysis, and automated interaction testing exhibited wallet-drainer behavior despite the absence of an apparent cryptocurrency business model. The single abuse report applies to shared hosting infrastructure and therefore is not, by itself, attribution to the website; it nevertheless adds adverse context. The real-world operator identity remains unverified. These combined signals warrant a clearly cautionary posture for sensitive interactions.

EVIDENCE

- The homepage presents ООО “БУРВОДМОНТАЖ” as a Moscow-region well-drilling company, while automated interaction testing recorded wallet-drainer behavior in both evaluated runs.
- External reputation analysis recorded 3 malicious and 2 suspicious detections, and two external blacklist sources flagged the domain.
- Domain registration records show registration on 2010-05-26 through RU-CENTER-RU, with an age of 16.25 years.
- Web-archive records contain 667 snapshots from 2011-05-30 through 2026-06-10, covering 16 years.

Regulatory Verification Notes

The homepage and service pages identify the business as ООО “Бурводмонтаж” and describe drilling, outfitting, water treatment, heating, regional coverage, pricing, guarantees, and document provision. The site does not present a license number or regulator for the services described, and the available disclosure state is therefore insufficient to independently establish the contracting entity or any applicable authorization. This is a regulatory and transparency verification gap rather than, by itself, proof of fraud. The available broker-reputation dataset contains no matching result, but that contextual absence does not offset the external blacklist findings.

EVIDENCE

- The homepage states that ООО “БУРВОДМОНТАЖ” has operated in well drilling and water-supply work since 2001 and claims more than 7,000 completed sites.
- The pricing and service pages describe artesian and sand wells, per-metre drilling prices, guarantees, and document handover, but no license number or licensing authority is identified.
- The site's hosting is recorded as AS210079, EUROBYTE – EuroByte LLC, RU.
- The site's TLS certificate is issued by YR1 at DV validation level and is valid until 2026-10-22T20:13:29+00:00.

What to Verify Next

Before any sensitive engagement, independently confirm that ООО “Бурводмонтаж” is the contracting party, that the quoted scope and guarantees will appear in a binding contract, and that any required local construction, drilling, water-treatment, or environmental permissions are current with the relevant authorities. Contact details should be confirmed through an independent route, and payment arrangements should use protections appropriate to a disputed or unverified supplier. Credentials or financial information should not be submitted until these checks and the external reputation contradiction have been resolved.

EVIDENCE

- The homepage provides the stated company identity, service description, regional coverage, pricing claims, and telephone contact details for independent comparison.
- The contact page is identified as the site's channel for telephone, email, and office-location information.
- The service and pricing pages provide the claims that should be matched against the written quotation and contract.

Summary Verdict

The website presents a plausible local-service business, but its overall posture is low trust because strong external reputation contradictions and anomalous runtime behavior materially undermine confidence in sensitive interaction. Legitimacy remains unverified, and the available evidence does not support treating the site as a reliable basis for account, credential, or financial activity.

Infrastructure Integrity

The site resolves directly to a single likely origin address without a detected CDN or WAF layer, so it lacks the additional edge protection and origin shielding commonly provided by mainstream delivery infrastructure. The direct hosting arrangement is a mitigating limitation rather than proof of maliciousness, but it provides no meaningful infrastructure-based offset to the adverse reputation findings.

Closing Assessment

The appropriate course is passive review only until the operator, contractual claims, applicable authorizations, and payment protections are independently confirmed; login, credential submission, and financial transactions should remain suspended in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk The public registration record for this domain is incomplete. Registration and ownership rule:KF_WHOIS_INCOMPLETE
02 Sensitive Interaction Risk - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor. Analysis engine signal:direct_threat - The page behaved in a way consistent with a crypto wallet drainer. Behaviour in a sandbox rule:BEHAV_WALLET_DRAINER_SUSPECT - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it. External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 185.12.93.38 (RuWeb LLC, Data Center/Web Hosting/Transit), 3% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of burwod.ru.

- The request stayed on burwod.ru. It was not redirected to another domain. [CLEAR](#)
- Registration is published under RU-CENTER-RU. [CLEAR](#)
- DNS for this domain is served by net., across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-26. [NOTED](#)
- The earliest public archive of this site is from 2011-05-30. [CLEAR](#)
- It is hosted on EUROBYTE, from a server in RU. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about burwod.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
