Full analysis

Overview

Buyhatke is an established Indian shopping-intelligence platform that presents price-history tracking, deal discovery, product comparison, coupon tools, discounted gift cards, and browser or mobile shopping utilities to help consumers shop more effectively.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent consumer-commerce model—tracking Amazon and Flipkart prices, identifying genuine discounts, comparing products, and offering retailer gift cards—without financial manipulation or deceptive identity claims. Independent reputation checks were clean, supporting the conclusion that the site is legitimate and suitable for normal interaction.

- The homepage describes price tracking, deal comparison, coupons, shopping utilities, and gift cards, with no red flags identified.
- The domain was registered in 2011 and is approximately 14.84 years old.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

Buyhatke presents itself as a shopping-comparison and consumer-commerce service rather than a regulated financial provider. The supplied content contains no licensing claim requiring financial-regulatory validation; the main transparency consideration is therefore ordinary confirmation of merchant, gift-card, and partner terms before specific purchases. The domain is registered through BigRock Solutions Ltd., and its established technical and traffic footprint supports a legitimate operating presence. No relevant third-party broker match was identified.

- Registered through BigRock Solutions Ltd.; expiration is recorded as 2030-10-03.
- Hosted on AS13335 (Cloudflare).
- TLS certificate issued by WE1 using DV validation, valid to 2026-10-18.

What to Verify Next

For specific transactions, confirm the applicable retailer's gift-card terms, availability, refund conditions, and fulfillment status. For account use, review the permissions and privacy terms of any browser or mobile utility before installation and confirm support channels through the site's own current service pages.

- The homepage states that PVR Gift Cards were temporarily unavailable while previously purchased cards remained valid.

- Behavioral testing found no login form, hidden sensitive form, wallet connection, clipboard hijacking, or password-external submission.

Summary Verdict

Buyhatke has a high-trust posture consistent with an established consumer-commerce platform. Its coherent business purpose, long operating history, clean reputation, and stable technical presentation support legitimate normal use.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF protection, with observed traffic terminating on Cloudflare edge addresses rather than an exposed origin. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not by itself proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard transactions are appropriate, subject to ordinary review of the terms applicable to any particular purchase or installed utility.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about buyhatke.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
