Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Buy+1 is a Taiwanese SaaS platform for social-commerce sellers, presenting tools for synchronizing Facebook and LINE orders, managing products and customers, reconciling payments, coordinating shipping, and integrating with ERP systems through subscription plans and a 15-day trial.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The homepage presents a coherent seller-management service with ordinary business functionality, including order synchronization, storefronts, inventory workflows, payment and logistics integrations, reporting, and ERP connectivity. Its behavioral profile showed no hidden forms, wallet activity, clipboard hijacking, cloaking, or suspicious scripts, supporting the conclusion that the site is a legitimate SaaS service rather than an impersonation or abuse platform.

- The homepage describes Buy+1 as a social-commerce seller system supporting Facebook, LINE, storefronts, orders, inventory, payments, logistics, and ERP integration.
- The homepage offers a 15-day trial and recurring subscription plans consistent with a conventional SaaS model.
- The site's interactive behavior recorded no hidden forms, wallet connections, wallet-drainer activity, or suspicious inline scripts.
- The domain was registered on 2016-04-12 and is approximately 10.31 years old.

Regulatory Verification Notes

The supplied site content does not present a regulated-financial service or claim a financial license. Its stated SaaS business model does not, on the available evidence, create a regulatory contradiction; any applicable commercial, data-protection, or payment-processing obligations should be assessed according to the relevant jurisdiction and service arrangement. Registration is attributed to PCHOME and the technical controls show established transport security.

- The domain registrar is PCHOME; recorded expiration is 2027-04-12.
- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by YE2 with DV validation, valid to 2026-10-19.

What to Verify Next

A prospective business customer should confirm the contracting entity, applicable service terms, and any sector-specific compliance obligations before entering a commercial relationship. Payment, logistics, ERP, and social-platform integrations should be reviewed against the organization’s procurement and data-governance requirements.

- The homepage identifies the service as a subscription SaaS platform for social-commerce sellers.
- The homepage references payment, logistics, electronic-invoice, and ERP integrations.
- The available content provides service functionality and pricing information but does not establish a financial-regulatory authorization.

Summary Verdict

Buy+1 presents as a legitimate, established SaaS business with a coherent operating model, clean security posture, and no observed impersonation or abuse contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge servers rather than an exposed origin address. This reduces direct origin exposure and is a meaningful protective control, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Normal business use is appropriate, subject to the organization’s routine procurement, contractual, and data-governance checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of buyplus1.com.tw.

- The request stayed on buyplus1.com.tw. It was not redirected to another domain. CLEAR
- Registration is published under PCHOME. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED

- The registration is paid up to 2027-04-12. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about buyplus1.com.tw at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
