

Is buytec.co.ke legit? TrustSniffer's high-trust assessment: 100/100

buytec.co.ke

Verdict

100

OUT OF 100

HIGH TRUST

buytec.co.ke appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Buytec Stores is a Kenyan technology ecommerce site offering priced IT hardware and electronics, including laptops, PCs, printers, networking equipment, servers, scanners, CCTV systems, and accessories. The page provides delivery and return terms, telephone and email contacts, a Nairobi office address, product quotations, account features, and customer reviews.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Kenyan ecommerce storefront selling IT hardware and electronics to consumers and businesses, with published pricing, quotation facilities, delivery and collection options, returns support, customer accounts, and order-tracking functions.

Scam/Impersonation Risk

No contradictory identity, phishing, impersonation, malicious-code, or deceptive financial-promise signals were observed. The storefront's coherent retail journey—including quotations, cart synchronization, fulfilment tracking, and customer support—is consistent with its stated commercial purpose. Its clean external reputation and multi-year registration history provide convergent evidence that this is a legitimate operating website rather than a recently created imitation.

- The homepage identifies the storefront as "Buytec Stores" and presents consistent retail, quotation, fulfilment, and account-management functions.
- The domain was registered in 2020 and is approximately 6.22 years old; its current registration runs to 2027-05-12 through Truehost AI.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browsing safety alert, and no reported abuse against the observed delivery infrastructure.
- Homepage interaction testing found no hidden forms, credential forwarding, cloaking, suspicious scripts, clipboard interference, or brand-impersonation indicators.

Regulatory Verification Notes

The available content describes ordinary technology retail rather than brokerage, investment, credit, or another activity for which a financial-services licence would ordinarily be central. No financial licence is claimed, and the broker-intelligence context contains no corresponding broker record; neither point is adverse for the business model presented. The homepage supplies a Nairobi office location, telephone contact, delivery terms, and refund information, although the supplied evidence does not establish the legal entity name that would appear on a formal invoice or contract.

- The homepage publishes same-day Nairobi delivery, countrywide shipping, click-and-collect, and a seven-day exchange and refund policy.
- The homepage provides telephone and online support channels together with a physical Nairobi office address.

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-10-24.
- The available third-party broker dataset contains no match for the business.

What to Verify Next

For procurement or material-value purchases, the ordering party should confirm the contracting entity and applicable tax details on a formal quotation or invoice, reconcile payment instructions with independently confirmed business channels, and review warranty, return, delivery, and collection conditions for the specific goods. These are proportionate transaction controls for hardware procurement rather than responses to detected fraud.

- The homepage offers creation and saving of official product quotations, providing a suitable document for confirming seller and payment particulars.
- The published fulfilment model includes local delivery, nationwide shipment, and shop collection, allowing the chosen handover method to be confirmed before payment.
- The stated exchange and refund arrangements provide a basis for obtaining product-specific return and warranty terms in writing.

Summary Verdict

The website presents a legitimate, established, and trustworthy ecommerce operation. Its identity, commercial content, technical behaviour, and external reputation converge without material contradiction, supporting normal interaction, including account login and standard purchases.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF layer, and all four observed addresses were edge nodes; the origin was therefore shielded from direct exposure during the assessment. This is a conventional protective architecture that mitigates origin-level attack exposure but is not, by itself, proof of business legitimacy.

- The hosting infrastructure is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Four Cloudflare edge addresses were observed, with no origin-server candidate exposed.
- The infrastructure resolved normally and was identified as trusted CDN capacity.

Closing Assessment

Prospective customers may use the site normally, applying standard ecommerce and procurement controls appropriate to the value and delivery method of each transaction.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of buytec.co.ke.

- The request stayed on buytec.co.ke. It was not redirected to another domain. CLEAR
- Registration is published under Truehost AI. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-12. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about buytec.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
