

Is bzdlxx.com safe? TrustSniffer's moderate-trust assessment: 65/100

bzdlxx.com

Verdict

65

OUT OF 100

MODERATE TRUST

bzdlxx.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

A Chinese-language municipal government-style page listing local news, government notices, statistics and contact details. Page title and repeated links include gambling-brand terms (e.g., '365提款', '365bet'), indicating likely SEO spam or content injection into an otherwise government site layout. No login forms or payment solicitations are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://bzd1xx.com/>

What bzd1xx.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Chinese-language website presents a municipal-government-style information portal containing local news, government notices, public-service navigation, statistical reports, leadership information, and contact details. Its apparent purpose is informational and public-service oriented, although gambling-related terms are embedded in the page title and repeated links.

Scam/Impersonation Risk

No confirmed phishing, impersonation, malicious activity, or other contradiction was observed. The principal concern is content integrity: the homepage combines credible-looking municipal material with repeated gambling-brand terms such as “365提款” and “365bet,” creating claim-to-content dissonance consistent with possible SEO spam, scraping, or content injection. No login form, payment solicitation, hidden sensitive form, wallet interaction, or suspicious external submission was detected. The available evidence therefore supports caution about relying on the page as an authoritative government source, but does not establish a scam.

EVIDENCE

- Homepage: Municipal navigation, government notices, statistical publications, local news, and public-service categories are present.
- Homepage: The title and repeated links contain “365提款,” “365bet,” and related gambling-oriented wording unrelated to the surrounding government content.
- Domain registration: Registered 2018-06-27 (~8.16 years old).
- Archive record: First seen 2014-12-17; last seen 2026-02-01; 13 years tracked.

Regulatory Verification Notes

The site presents itself through government-style content, but the available material does not clearly establish the responsible legal operator or disclose a license or registration number. This is a transparency and affiliation-verification gap rather than evidence of fraud. The domain is registered through NameSilo, LLC, and recorded external reputation checks found no malicious, suspicious, or blacklist indication; coverage was partial, so those results are supportive but not conclusive. A domain-validated TLS certificate protects the connection but does not independently authenticate the purported municipal affiliation.

EVIDENCE

- Registration record: Registrar identified as NameSilo, LLC.
- Transport encryption: TLS certificate issued by YR1 with DV validation, valid to 2026-10-22.
- External reputation observations: No malicious or suspicious detections, no blacklist indication, and zero reported abuse records were recorded in the supplied checks.
- Homepage: No license claim, licensing authority, or license number is presented in the available page material.

What to Verify Next

Before using the site for official government information or relying on its contact details, independently confirm the domain and municipal affiliation through an authoritative government directory or an offline contact route. Any licensing or institutional claim relevant to a proposed transaction should be checked against the applicable official registry. For sensitive or high-value actions, confirm that the destination, responsible entity, and published terms are consistent through an independently sourced channel.

EVIDENCE

- Homepage: Government-style navigation and public-service content provide the basis for an affiliation check against an authoritative municipal source.
- Homepage: The unrelated gambling terminology provides a specific reason to validate the page's content integrity before relying on its notices or contacts.
- Available page material: No sensitive form or payment workflow was observed, so verification should focus on authenticity and information reliability rather than an active transaction flow.

Summary Verdict

The website has a **moderate-trust posture** with no observed scam or impersonation contradiction, but its real-world operator and institutional affiliation remain unverified. Ordinary informational viewing is supportable, while confidence should not extend to consequential reliance without independent confirmation.

Infrastructure Integrity

The site is hosted by PEG-LA - PEG TECH INC in the United States and resolves directly to likely origin infrastructure; no CDN or WAF vendor was detected. The infrastructure is identifiable, but it provides limited protective mediation compared with a mainstream CDN deployment and should be treated only as a technical context signal, not proof of legitimacy.

EVIDENCE

- Hosting infrastructure: Served from AS398823 (PEG-LA - PEG TECH INC, US).
- Network resolution: Two IP addresses were identified as likely origin addresses, with zero edge IPs and no detected CDN.
- Hosting registry: Network registration is through ARIN.

Closing Assessment

Routine, low-consequence browsing is reasonable, but independent confirmation should precede reliance on the site for sensitive decisions, official submissions, or high-value activity.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bzdlxx.com.

- The request stayed on bzdlxx.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-06-27. NOTED
- The earliest public archive of this site is from 2014-12-17. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bzdlxx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
