

Is c-r-r.com a scam? TrustSniffer's high-risk assessment: 0/100

c-r-r.com

Verdict

0

OUT OF 100

CRITICAL RISK

c-r-r.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A non-interactive 'under construction' / hosting placeholder page showing AT&T Website Solutions branding with links to AT&T web hosting and a contact phone number. No forms or transaction flows present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://c-r-r.com/>

What c-r-r.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at c-r-r.com is an AT&T Website Solutions “under construction” hosting placeholder that presents a future-site message, promotes AT&T web-hosting services, and provides a telephone contact route rather than offering an active commercial or transactional service.

Scam/Impersonation Risk

The site presents no login form, payment flow, sensitive-data collection, wallet functionality, or other active interaction surface, and its page explicitly states that AT&T does not own the domain. The page-level content therefore does not itself establish impersonation or an active phishing mechanism. However, the domain is subject to a **confirmed blacklist** and multiple external threat detections, including detections by major security providers; that external evidence is materially more significant than the benign appearance of the parked page and creates a critical risk for credentials, financial activity, or other sensitive interaction. No conflicting legal identities were observed.

EVIDENCE

- The homepage is a non-interactive “under construction” page with no forms, login controls, or transaction flow.
- The homepage carries AT&T Website Solutions branding while expressly stating that AT&T does not own the domain.
- External reputation telemetry records 15 malicious detections, a confirmed blacklist status, and Tier-1 detections associated with Fortinet, Kaspersky, and Sophos.
- The domain was registered on 2022-09-20 and is approximately 3.92 years old.

Regulatory Verification Notes

The available page is a hosting placeholder rather than a financial, brokerage, investment, or other regulated service, so it makes no licensing or registration claim. It also does not identify an operating business behind the domain beyond the hosting-provider disclaimer; the apparent AT&T branding must not be treated as proof that AT&T operates or endorses the domain. The independently identified domain registrant is not sufficient, on its own, to establish the real-world operator or any regulated status. No broker-intelligence match was identified.

EVIDENCE

- The homepage describes hosting services and states that AT&T Website Solutions provides the hosting.
- The homepage contains no licence number, regulatory registration, or operator-specific legal disclosure.
- The domain is registered through Hostopia Canada Corp.
- Hosted on AS30447 (INFB2-AS - Internet Names For Business Inc., CA); TLS uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-09-19.

What to Verify Next

Before any sensitive interaction, independently establish the domain operator and confirm that any claimed relationship with AT&T is genuine through an official AT&T channel rather than through the website itself. If the domain is presented in connection with a regulated financial or commercial service, confirm the relevant entity and licence directly with the applicable regulator or corporate registry. Contact routes should be authenticated through an independent, offline or separately sourced channel.

EVIDENCE

- The homepage provides only a hosting-placeholder explanation and does not identify an operating entity for the domain.
- The homepage's AT&T attribution is accompanied by a disclaimer that the domain is not owned by AT&T.
- The page has no transaction, authentication, or regulated-service workflow against which operator claims can be validated.

Summary Verdict

The overall posture is **critical trust risk**. The site's benign parked-page presentation does not offset the confirmed external blacklist and malicious-detection evidence, while the real-world operator remains unverified.

Infrastructure Integrity

The domain resolves directly to one likely origin address, with no CDN or WAF detected and no edge-IP layer identified. This infrastructure posture provides limited protective separation and should not be interpreted as evidence of legitimacy.

Closing Assessment

The appropriate posture is passive observation only until the domain’s operator and any associated business claims are independently validated; credentials, financial information, and other sensitive interactions should not be submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of c-r-r.com.

- The request stayed on c-r-r.com. It was not redirected to another domain. CLEAR
- Registration is published under Hostopia Canada Corp. CLEAR
- DNS for this domain is served by digitalspaceportal.net, across 2 name servers. NOTED
- The registration is paid up to 2026-09-20. NOTED

- The earliest public archive of this site is from 2001-04-28. CLEAR
- It is hosted on INFB2-AS, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about c-r-r.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
