

cablewireltd.site: analysis blocked, no trust verdict

cablewireltd.site

Verdict

n/a

NEEDS REVIEW

The site blocked our scan, so no score was assigned.

cablewireltd.site blocked our automated scan and could not be verified.

The site blocked our scan, so nothing was confirmed either way. Treat it as unknown and verify the business another way.

Needs Review

Assessed 2026-09-23 by automated analysis.

What this site appears to be

Index of /AnName, Last Modified, Size, listing of directories and files (cgi-bin, masabik23, masabik232, masfrnd, massfrnd232, mrprince, ppriincefil21, php.ini). Footer: Proudly Served by LiteSpeed Web Server at cablewireltd.site Port 443.

Evidence status and limitations

- Evidence completeness: INCOMPLETE
- Capture was incomplete or blocked; this result requires review.
 - The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Name		Last Modified
------	--	---------------

What cablewireltd.site served when TrustSniffer captured it on 2026-09-23. The page may look different now.

Key findings

- The site blocked automated access, so TrustSniffer could not collect enough evidence to assign a score.

Full analysis

Overview

What is presented is a bare directory index for cablewireltd.site rather than a functioning commercial or financial service. The homepage exposes server directories and files, including “cgi-bin,” several similarly named directories, and “php.ini,” with no visible description of the operator, service, or intended business purpose.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradiction was observed, and the available external reputation signals did not identify malicious activity. The principal concern is provenance rather than an identified scam mechanism: the site is recently registered, presents only a minimally contextualized directory listing, and does not establish why the exposed files are available to visitors. This supports verification before sensitive or high-value activity, but does not constitute evidence that the site is fraudulent.

EVIDENCE

- The homepage is an auto-generated “Index of /” directory listing with no login form, payment flow, external submission form, or visible malicious indicator.
- Domain registration evidence records cablewireltd.site as registered in 2026 and approximately 1 day old at collection.
- External reputation checks recorded no malicious or suspicious detections, no blacklist hit, zero abuse reports, and a whitelisted CDN usage classification.

Regulatory Verification Notes

The observed homepage contains no identifiable operating entity, legal terms, licensing statement, registration number, or business-service explanation. Identity verification therefore remains unresolved, and any regulatory status cannot be established from the available site content. The absence of a broker match in the contextual third-party dataset is a limited reputational signal only and is not evidence of licensing or regulatory approval.

EVIDENCE

- The homepage contains only a directory index and a LiteSpeed server footer; it does not present an operator name, legal entity, or license disclosure.
- WHOIS records identify Spaceship, Inc. as registrar and show registration on 2026-09-21, with expiration on 2027-09-21.
- The observed page contains no stated financial, membership, commerce, or regulated-service model against which a license could be assessed.

What to Verify Next

Before any credential submission, download, payment, or other sensitive interaction, an independent source should identify the real-world operator and confirm that the domain is an intended channel for that entity. If the site is expected to provide a regulated or financial service, the claimed operator and authorization should be checked directly against the relevant official registry; the purpose and safety of each exposed file should also be established before access.

EVIDENCE

- The homepage exposes a directory rather than a documented service, leaving the site’s intended function to be independently established.
- The observed page contains no stated legal entity or regulatory authorization from which an official identity check can be completed.

Summary Verdict

The site has a **Needs Review** posture. No active threat or impersonation contradiction was identified, but the available evidence is insufficient to connect the domain confidently to an accountable operator or a defined legitimate service.

Infrastructure Integrity

The site is delivered through Cloudflare’s CDN/WAF infrastructure, with all observed addresses belonging to CDN edge servers and no origin server address observable in this analysis. This provides a meaningful layer of network protection and exposure reduction, but it is only a mitigating infrastructure characteristic and does not establish site legitimacy.

EVIDENCE

- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Observed edge addresses: 104.21.57.246, 172.67.167.144, 2606:4700:3034::ac43:a790, and 2606:4700:3035::6815:39f6; likely origin addresses observed: 0.
- TLS certificate uses DV validation, is issued by YE1, and is valid to 2026-12-20T12:03:40+00:00.

Closing Assessment

Sensitive or high-value interaction should be deferred until the operator, intended purpose, and any applicable authorization have been independently confirmed.

Written analysis generated 2026-09-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by capture.

01 Needs Review

- The site blocked automated access by TrustSniffer, or served nothing usable, so the analysis could not be completed.

Capture capture:blocked_or_unavailable

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cablewireltd.site.

- The request stayed on cablewireltd.site. It was not redirected to another domain.

CLEAR
- Registration is published under Spaceship, Inc..

CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers.

NOTED
- The registration is paid up to 2027-09-21.

NOTED

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cablewireltd.site at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
