Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Cacau Show is an established-looking Brazilian direct-to-consumer retail website presenting chocolates, gifts, lifestyle merchandise, product pricing, promotions, and online purchasing functionality. Its apparent business model is conventional e-commerce, with revenue generated through product sales.

Scam/Impersonation Risk

No contradictions were observed across the homepage, product-category content, and associated contact or policy surfaces. The site presents a coherent retail proposition, with product cards, prices, promotional mechanics, store-related information, and no detected phishing, brand-impersonation, malicious-content, or suspicious-form indicators. External reputation checks were also clean, supporting an apparently legitimate and low-risk assessment; however, the available evidence does not independently verify the real-world operator behind the site.

EVIDENCE

- The homepage and product-category page present a consistent Cacau Show retail storefront with chocolate and gift product cards, prices, promotions, and add-to-cart functions.
- Domain registration records show registration on 1999-09-01, with an age of 26.98 years.
- Historical records show 981 archive snapshots from 2000-12-06 through 2026-06-27, covering 27 years.
- External checks recorded zero malicious detections, zero suspicious detections, and no reported phishing or impersonation indicators.

Regulatory Verification Notes

The reviewed pages provide commercial context through company and contact information, policies, store-location functions, franchise and reseller pathways, and a postal-address lookup. No financial-services licensing claim or license number is presented, which is consistent with the apparent retail business model and is a transparency point rather than evidence of a scam. The site should nevertheless be treated as apparently legitimate rather than as proof of independently verified operator identity, particularly for franchise, reseller, or other higher-value commercial arrangements.

EVIDENCE

- The homepage exposes links for company-related information, policies, store discovery, franchising, reseller activity, and business services.
- The site's hosting telemetry identifies AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by GoDaddy TLS Intermediate CA DV - R1v1, uses DV validation, and is valid to 2027-01-19.
- The reviewed commerce flow contains an address-lookup form and add-to-cart functionality, with no sensitive form or untrusted destination detected.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the merchant identity, customer-service channels, return conditions, and payment-protection arrangements correspond to the intended Cacau Show business. Any franchise or reseller proposal should additionally be validated through independently sourced corporate contact details and documented commercial terms rather than relying solely on information supplied through the website.

EVIDENCE

- The reviewed page exposes a standard add-to-cart commerce function rather than a sensitive credential-collection form.
- No external password form, hidden sensitive form, wallet connection, or clipboard-manipulation behavior was detected during the observed interactions.
- The site presents return, policy, contact, store, franchise, and reseller pathways that can be checked against independently sourced business information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. No scam or impersonation contradictions were observed, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer between visitors and the site's backend. Resolution identified two observed edge addresses in AS16509, AMAZON-02 - Amazon.com, Inc., US; the origin server was not exposed in the observed infrastructure, which is consistent with normal CDN deployment and is not, by itself, evidence of risk.

Closing Assessment

Ordinary use may proceed on a proportionate basis, with independent merchant-identity, return-policy, and payment-protection checks completed before submitting credentials or payment information.

Written analysis generated 2026-08-16 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cacaushow.com.br.

- The request stayed on cacaushow.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-01. NOTED
- The earliest public archive of this site is from 2000-12-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cacaushow.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
