

Is cafesanmartin.com.ni safe? TrustSniffer's moderate-trust assessment: 65/100

cafesanmartin.com.ni

Verdict

65

OUT OF 100

MODERATE TRUST

cafesanmartin.com.ni is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Website for Café San Martín, a Nicaraguan coffee brand describing product qualities, sizes, company history and contact/address information. No forms or financial flows visible beyond product promotion.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Café San Martín is a Nicaraguan coffee-brand website presenting the Café San Martín name, product descriptions, package sizes, brand history, and contact details, with an apparent purpose of promoting and supporting the sale of locally produced coffee.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other identity contradictions were observed. The homepage presents a conventional local-business model, describing Arabica coffee produced in Nicaragua and listing 28g and 454g products; no login, payment, financial solicitation, sensitive-data form, wallet connection, or suspicious browser behavior was identified. The marketing statement “El mejor Café de Nicaragua” is an ordinary promotional superlative rather than, on the available evidence, a contradiction or abuse indicator.

EVIDENCE

- Homepage: describes Café San Martín coffee, production in El Tuma La Dalia, product qualities, and 28g and 454g formats.
- Homepage interaction assessment: 0 forms, no sensitive form, no login form, no hidden form, and no wallet activity.
- Site behavior: 2 successful runs, 0 external XHR requests, 0 external POST requests, and 0 suspicious inline scripts.
- Domain history: registered in 2018 and approximately 8.03 years old; 346 archive snapshots spanning 2018–2026 across 9 tracked years.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate local commercial website, but the real-world operator identity is not independently verified. The “Historia,” “Sobre nosotros,” and “Contacto” content provides business context and a physical contact point, while the site does not present a licensing claim or registration number; for a coffee retailer, this is a transparency and business-verification matter rather than evidence of misconduct. Independent reputation coverage is limited, but the available external checks found no malicious or suspicious detections, no external blacklist hit, and no abuse reports; these signals support the absence of an observed threat without constituting legal or regulatory validation.

EVIDENCE

- Contact page: provides a Managua address and a Nicaraguan telephone number.
- Legal and identity content: includes a company-history section but no stated license authority or license number.
- Transport encryption: TLS certificate issued by YR2, DV validation, valid to 2026-10-31.
- External reputation results: 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist hit.

What to Verify Next

Before a material commercial commitment, independently confirm the business name, address, and operating status through an appropriate Nicaraguan business or commercial registry. Confirm official contact channels through an offline or independently sourced route, and use payment methods that provide transaction records and dispute protections. Any product-order or delivery terms should be obtained and retained before payment.

EVIDENCE

- Business-identity check: independently match the published business details against an authoritative registry or local commercial source.
- Contact-channel check: validate the published contact route using an independent source rather than relying solely on the website.
- Transaction check: establish documented pricing, fulfillment, refund, and payment-protection terms before committing funds.

Summary Verdict

The overall posture is **moderate trust** and the available evidence supports ordinary informational or read-only interaction with an apparently legitimate local business website. No contradictions were observed, but the operator’s real-world identity is not independently verified, so the site should not be treated as fully authenticated for sensitive or material commitments.

Infrastructure Integrity

The site resolves directly to a single hosting address without a detected CDN or WAF layer. Its hosting is provided through AS18840 — EQUIPOS Y SISTEMAS S.A., NI; this gives a resolved and attributable network presence, while the absence of an intermediary protection layer means the hosting arrangement itself provides limited additional mitigation.

EVIDENCE

- Hosting infrastructure: served from AS18840 (EQUIPOS Y SISTEMAS S.A., NI), LACNIC registry, Nicaragua.
- IP posture: 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN detected.

Closing Assessment

Proceed with ordinary browsing and initial low-exposure commercial engagement, while completing independent business-identity and transaction-protection checks before providing sensitive information or committing substantial funds.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cafesanmartin.com.ni.

- The request stayed on cafesanmartin.com.ni. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2018-08-08. CLEAR
- It is hosted on AS18840, from a server in NI. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [cafesanmartin.com.ni](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
