

Is caib.es legit? TrustSniffer's high-trust assessment: 94/100

caib.es

Verdict

94

OUT OF 100

HIGH TRUST

caib.es appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Regional government website (Govern de les Illes Balears) offering navigation to services, news, citizen procedures, contact information and topical pages across health, environment, housing, economy, education and social services. The page is informational and public-service oriented with no financial solicitation evident in the provided content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a regional public-sector portal for the Govern de les Illes Balears, presenting citizen services, administrative procedures, news, contacts, and information across health, housing, education, employment, environment, transport, and social services rather than a commercial or financial offering.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent government and public-service purpose, with navigation for citizen procedures, public information, and administrative contacts; the supplied content contains no financial solicitation, credential-harvesting form, wallet connection, or suspicious destination. A naming-similarity signal associated the site with a generic government-domain pattern, but the signal is not corroborated by impersonation, phishing, malicious-content, or reputation findings. The available evidence is therefore consistent with an established, apparently legitimate public-service website, while not independently proving the real-world operator identity.

EVIDENCE

- The homepage is titled “Inici - Web GOIB” and contains public-service navigation covering health, education, housing, employment, social services, procedures, and government information.
- The homepage analysis recorded no login form, hidden sensitive form, external password form, wallet activity, or cloaking.
- External checks recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, `external\_blacklist: false`, and `signature\_match\_count: 0`.
- The site was recorded within the global top one million traffic-ranked domains at rank `27726`.

Regulatory Verification Notes

The supplied page content identifies a regional administration and describes a public-service portal, not a financial, investment, brokerage, or payment business. No financial license or registration number is claimed in the supplied content; this is a limited disclosure point for any specific service involving regulated activity, but it is not evidence of a scam where no such offering is presented. The on-site presentation is consistent with government administration, although independent evidence connecting the website to the real-world operator remains unverified. The transport certificate and government-associated hosting provide supporting technical consistency rather than legal proof.

EVIDENCE

- The homepage identifies “Govern de les Illes Balears” and offers administrative procedures, public information, news, and contact navigation.
- The site uses an OV TLS certificate issued by `ACCV RSA1 TLS`, with validation level `OV`, subject organization `COMUNITAT AUTONOMA DE LES ILLES BALEARS`, valid to `2027-02-22T11:37:19+00:00`.
- The site is served from `AS43697`, identified as `Govern-de-les-Illes-Balears - Govern-de-les-Illes-Balears, ES`.
- The third-party broker-reputation dataset recorded no match.

What to Verify Next

Before credential or payment interactions connected with any particular government procedure, the service should be reached through an independently confirmed official government directory or an offline contact route, and the exact destination should be checked after any redirect. Any transaction-specific terms, privacy notice, refund or consumer protections, and payment-processing arrangements should be reviewed separately because those details are not established by the supplied homepage evidence.

EVIDENCE

- The homepage provides a Catalan/Spanish language selector, a site-wide search function, procedural navigation, and public contact pathways that can be compared with independently sourced government information.
- The supplied homepage capture contains no sensitive form, so any later page requesting credentials or payment information should be treated as a distinct transaction surface requiring separate confirmation.
- The site capture completed with HTTP status `200` in `2` successful runs out of `2`, supporting stable retrieval of the assessed homepage.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate regional public-service website. No scam, phishing, impersonation, or other contradictory signal was identified, but the classification should not be treated as independent proof of the real-world operator's identity.

Infrastructure Integrity

The site resolves directly to government-operated infrastructure in Spain, with no detected CDN or WAF edge layer. Direct hosting provides a clear infrastructure association, while the absence of a protective intermediary means the hosting environment itself remains the relevant technical control point.

EVIDENCE

- Hosting is recorded on `AS43697` with provider `Govern-de-les-Illes-Balears - Govern-de-les-Illes-Balears, ES`, registry `ripencc`, country `ES`.
- Infrastructure resolution identified `2` unique IP addresses, `0` edge IP addresses, and `2` likely origin IP addresses; `has\_cdn: false`.

Closing Assessment

Routine informational browsing is proportionate to the evidence; before submitting credentials or payment details for any specific procedure, ordinary independent checks of official identity, applicable service terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of caib.es.

- The request stayed on caib.es. It was not redirected to another domain. CLEAR
- It is hosted on Govern-de-les-Illes-Balears, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about caib.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
