Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

CAN ONLINE SHOP is a Japanese women's fashion ecommerce storefront offering Samansa Mos2, Te chichi, and related clothing, accessories, promotions, reviews, shopping guidance, customer support, and affiliated-store services through an ordinary retail model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent fashion-retail business, with no detected phishing, brand-impersonation, malicious-content, cryptocurrency, or sensitive-form indicators. External reputation checks were clean, and the site maintains an established traffic footprint consistent with a genuine commercial operation.

- The homepage is an ecommerce storefront with product catalogues, prices, reviews, shopping guidance, and customer-support navigation.
- The site's domain was registered in 2009 and is approximately 16.9 years old.
- The archive records 340 snapshots across 18 years, from 2009-09-10 through 2026-06-07.

Regulatory Verification Notes

The site provides company and legal links appropriate to an ecommerce business, alongside customer-service and shopping information. No regulated-financial authorization is claimed or required by the described retail model; any further confirmation should therefore concern ordinary commercial disclosures, such as returns, privacy, delivery, and seller information. No separate broker-reputation match was identified.

- The homepage links to legal/company information, contact support, FAQs, and usage guidance.
- Hosting is identified as AS16509, Amazon.com, Inc. (Amazon Data Services Japan).
- TLS uses a DV certificate issued by Amazon RSA 2048 M01, valid through 2026-12-28.

What to Verify Next

Before a material purchase, confirm that delivery, returns, privacy, payment, and customer-support terms on the site align with the intended transaction. For higher-value commercial engagement, independently confirm the seller details and official support channels using information from the site's company and legal pages.

- Shopping guides and FAQ content provide the relevant operational information for delivery and purchase review.
- Product pages provide item descriptions, pricing, availability, and customer-facing purchase context.

Summary Verdict

The site presents as a legitimate, established, and trustworthy fashion retailer with a coherent business purpose and no observed scam or impersonation indicators. Normal interaction, including account login and standard ecommerce use, is appropriate.

Infrastructure Integrity

The site is served through Amazon infrastructure, with confirmed TLS protection from a mainstream certificate issuer. The supplied evidence does not establish a separate CDN or WAF layer; this is a neutral infrastructure observation and does not undermine the site's overall trust assessment.

Closing Assessment

Standard browsing, account use, and ordinary purchases are appropriate, subject to routine review of transaction terms before higher-value orders.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of canshop.jp.

- The request stayed on canshop.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2009-09-10. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about canshop.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
