- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Capitalist is a Portuguese-language digital news portal presenting coverage of economics, finance, investments, employment, health, agribusiness, technology, politics and general-interest topics. Its apparent business model is advertising-supported journalism, supplemented potentially by sponsored content or commercial partnerships, rather than direct financial services or transactional activity.

Scam/Impersonation Risk

No contradictions were observed: there were no phishing, impersonation, malicious-reputation, or blacklist indicators, and the site's homepage presents ordinary editorial content rather than a credential-collection or investment-conversion funnel. Controlled interaction produced some external network activity and page-structure changes, but no hidden forms, password submissions, wallet activity, cloaking, clipboard manipulation, or other abuse pattern was identified; these observations therefore do not outweigh the broader clean-risk evidence. The homepage also identifies the publisher as VS3 Digital LTDA, although that on-page statement is not independent proof of the real-world operator.

EVIDENCE

- The homepage presents editorial navigation and recent articles across economy, finance, health, agribusiness, employment and politics, with no login or sensitive-data form observed.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no phishing-site flag, and no blacklist hit for the domain.
- The domain is within the global top 1 million traffic cohort, supporting an established public footprint.
- Domain registration continuity: registered 2020-02-25 (~6.46 years old); archive history records 331 snapshots from 2020-08-11 through 2026-04-18, spanning 7 years tracked.

Regulatory Verification Notes

The site appears to operate as a media publisher, not as a platform offering regulated financial products. Its homepage provides the publisher name VS3 Digital LTDA, but the available evidence does not independently verify the legal operator or establish a regulatory affiliation. No financial-services license claim or registration number was presented; for the current editorial model this is a disclosure point rather than evidence of deception, but any future expansion into paid products, financial advice, or other regulated activity would require separate licensing verification. A third-party broker-reputation dataset produced no match, which is contextual support only and not a regulatory determination.

EVIDENCE

- The homepage publisher information identifies “VS3 Digital LTDA.”
- The homepage’s visible business model is an advertising-supported news operation and contains no stated financial-services license or license number.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The site’s TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-15T17:15:20+00:00.

What to Verify Next

Before any credential or payment interaction prompted by a future page, an independent check should confirm that the counterparty name, support channels, terms, and any applicable refund or payment-protection arrangements correspond to the publisher identified on the homepage. If the site begins offering regulated financial services, licensing should be confirmed directly with the relevant Brazilian registry rather than inferred from the website’s presentation. Independent confirmation should be obtained through an offline or separately sourced contact route if a material transaction is contemplated.

EVIDENCE

- The homepage interaction surface contains no login form, sensitive form, or untrusted form destination.
- The homepage contains a cookie notice and publisher information, providing a basis for checking future transactional or account-related claims against the stated publisher.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The principal qualification is that the real-world operator identity remains independently unverified, so the site’s apparent legitimacy should not be treated as proof of legal ownership.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a meaningful mitigating control against direct exposure of the hosting environment. All observed addresses were CDN edge endpoints, and no origin-server address was identified; this improves infrastructure resilience but is not, by itself, evidence of legitimacy.

EVIDENCE

- Observed edge IPs were 104.26.14.130, 104.26.15.130, 172.67.71.118, 2606:4700:20::681a:e82, plus two additional edge addresses; all six observed addresses were CDN edges and 0 origin candidates were identified.

Closing Assessment

Normal editorial browsing is proportionate to the evidence. Credential or payment interactions should proceed only after the ordinary independent identity, terms, and payment-protection checks described above have been completed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of capitalist.com.br.

- The request stayed on capitalist.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2032-02-25. CLEAR
- The earliest public archive of this site is from 2020-08-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about capitalist.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
