Full analysis

Overview

The website is an established Mexican Shopify ecommerce storefront serving mobile-device repair technicians and wholesalers through the sale of replacement displays, batteries, components, tools, soldering supplies, diagnostic equipment, and related consumables, with prices presented in Mexican pesos and fulfilment offered across Mexico.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other deceptive behavior were observed. The long-established domain, clean threat-reputation results, consistent Capital Móvil branding, and ordinary retail presentation collectively support an authentic commercial operation rather than an imitation storefront. Interactive testing also found no hidden forms, credential redirection, cloaking, wallet activity, clipboard manipulation, or suspicious external submissions.

- The domain registration record shows registration through GoDaddy.com on 30 April 2020, making the domain approximately 6.25 years old; registration extends to 30 April 2031.
- The homepage consistently identifies the storefront as Capital Móvil and contains no competing legal or brand identity.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing, impersonation, or confirmed threat-list finding.
- Behavioral examination of the homepage completed 2 of 2 runs successfully, with 0 external XHR requests, 0 external form submissions, and no hidden or sensitive forms.

Regulatory Verification Notes

The observed business model is conventional retail commerce rather than a regulated financial, investment, or brokerage service, so the absence of a financial-services licence is not adverse. The homepage provides warranty and support resources, payment information, and standard Shopify legal-policy links. No conflicting entity names appear in the supplied content; however, the available page evidence does not establish the precise contracting legal entity behind the Capital Móvil trading name.

- The homepage links visitors to warranty, support, payment, and standard legal-policy resources associated with the storefront.
- The homepage describes sales to repair technicians and wholesalers, supported by displayed product pricing and conventional shopping-cart functionality.
- The site is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).

- The site's transport encryption uses a valid DV certificate issued by YE1, valid until 13 September 2026.

What to Verify Next

Before material wholesale procurement, the contracting entity shown at checkout should be matched to the entity named on the invoice and payment record. Buyers should also review the applicable warranty, returns, delivery, and payment terms for the selected goods and independently confirm the relevant branch or official contact channel when arranging collection, bulk purchasing, or after-sales service.

- The homepage advertises free shipping for purchases above MXN 2,499, making the detailed fulfilment conditions relevant before payment.
- The storefront states that it ships throughout Mexico and refers to inventory held at branches.
- The checkout presentation states that taxes, discounts, and shipping are calculated during the payment process.
- The homepage presents multiple official social channels and dedicated support resources that can be used to corroborate customer-service arrangements.

Summary Verdict

The website is legitimate, established, and trustworthy, with a coherent commercial identity and no observed contradictory or malicious signals. Its domain tenure, clean external reputation, substantive retail content, and benign observed behavior provide convergent support for a high-confidence trust posture.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed address operating as an edge endpoint rather than a directly exposed origin server. This arrangement reduces direct infrastructure exposure and is a meaningful security mitigation, although protective hosting alone is not evidence of commercial legitimacy.

Closing Assessment

Normal interaction, including account login, checkout, and standard purchases, is appropriate, subject to ordinary ecommerce diligence for order terms and material wholesale commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about capitalmovil.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
