

Is caribbean-music.net legit? TrustSniffer's high-trust assessment: 90/100

caribbean-music.net

Verdict

90
OUT OF 100

HIGH TRUST

caribbean-music.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A French-language Caribbean music portal featuring clips, playlists, artist pages, event listings and partnership information. Contains cookie-consent UI and typical site navigation.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

A French-language Caribbean music and entertainment portal, Caribbean-Music presents Zouk, Dancehall, Konpa and related content through music clips, playlists, artist pages, event listings and partnership information, with an apparent business model based on advertising, partnerships and event promotion or ticket-affiliate activity.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The site behaves as an informational media service rather than a financial or cryptocurrency platform, and it contains no login form, sensitive data form, wallet connection, or external password submission. Interaction testing did record dynamic page changes, external activity and console errors, but these were not accompanied by hidden forms, credential capture, wallet-drainer behavior, cloaking, or non-whitelisted external requests; the signals therefore indicate implementation noise rather than a demonstrated abuse pattern.

EVIDENCE

- The homepage identifies the service as a Caribbean music portal covering Zouk, Konpa and Dancehall, with no detected phishing or brand-impersonation indicators.
- The homepage contained 0 login forms, 0 hidden forms, 0 external password forms and 0 wallet-connection runs during interaction testing.
- External reputation checks recorded 0 malicious results, 0 suspicious results, 0 abuse reports and no blacklist or safe-browsing hit.

Regulatory Verification Notes

The available content supports an apparently legitimate media and events website, but the real-world operator identity is not independently verified. The site does not present a regulated financial-service proposition or claim a specific license in the supplied pages; any ticketing, partnership or affiliate activity should therefore be assessed according to the identity and obligations of the relevant commercial counterparty. A contextual broker-reputation dataset produced no match, which is reputational context only and not evidence of licensing or regulatory authorization. The domain and technical history provide affirmative establishment signals, while the site's legal and commercial disclosures should still be treated as requiring ordinary business verification.

EVIDENCE

- Domain registration records show registration on 2016-05-06, with an age of 10.29 years and expiry on 2027-05-06.
- Web-archive records show 79 snapshots spanning 2002–2026, covering 25 years tracked.
- The site's hosting record identifies AS50474, O2SWITCH - O2SWITCH SAS, France.
- The site's TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid to 2026-10-13.

What to Verify Next

Before any credential or payment interaction, independently confirm the legal identity of the operator and the commercial identity of any event or ticketing partner. For paid activity, review the applicable merchant's return, cancellation and refund terms and use payment methods offering appropriate transaction protection. Contact channels and partnership claims should be confirmed through independently sourced information rather than relying solely on details presented on the site.

EVIDENCE

- The homepage presents partnership and event-related content that may involve third-party commercial relationships.
- The available page analysis classifies the site as informational/media and identifies no sensitive transaction form.
- The site's business description indicates possible advertising, partnership, event-promotion and affiliate-ticketing monetization.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The classification is strong at the website-risk level, while the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to a single origin address rather than through a detected CDN or WAF, so it does not receive the additional exposure-mitigation benefit of edge delivery. Its transport encryption is nevertheless valid, and the resolved infrastructure is stable; this is a mitigating technical signal, not proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed risk posture; credential or payment activity should proceed only after the routine independent merchant, transaction-protection and counterparty checks described above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of caribbean-music.net.

- The request stayed on caribbean-music.net. It was not redirected to another domain. CLEAR
- Registration is published under Scaleway SAS. CLEAR
- DNS for this domain is served by o2switch.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-06. NOTED
- The earliest public archive of this site is from 2002-06-28. CLEAR
- It is hosted on O2SWITCH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about caribbean-music.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
