## The page as captured

https://carpex.com.tr/

What carpex.com.tr served when TrustSniffer captured it on 2026-08-22. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

This is a Turkish corporate/product website presenting Carpex-branded hygiene products, professional scenting devices and aromas, cleaning chemicals, automotive-care products, and corporate scenting services for business customers.

### Scam/Impersonation Risk

The site presents a coherent corporate profile and its page-level analysis found no overt deceptive content, login mechanism, hidden form, wallet connection, or suspected brand impersonation. However, this benign presentation is materially outweighed by confirmed external blacklist status and multiple malicious detections, including three malicious and one suspicious result in external reputation telemetry. The domain has a long registration history and sustained archival presence, but those provenance signals do not resolve the current reputation contradiction; sensitive interaction should therefore be treated as high risk.

#### EVIDENCE

- The homepage identifies the business model as hygiene, sanitation, professional scenting, and cleaning-chemical supply, with no page-level red flags recorded.
- Domain registration: 2002-08-09; age 24.05 years; expiry 2028-08-08.
- Web archives contain 214 snapshots from 2010-11-08 through 2026-06-06, spanning 17 tracked years.
- External reputation telemetry records 3 malicious and 1 suspicious detections, together with a confirmed blacklist status.

### Regulatory Verification Notes

The legal and contact content names “Netpak Hijyen Ve Kokulandırma Sistemleri A.Ş.” and provides an İzmir address, telephone numbers, policy pages, and corporate statements. This supports an apparent operating identity, but independent identity verification remains incomplete and the available material does not establish that the website is controlled by that named entity. No licensing authority or license number is presented; for this type of corporate supplier, that is a disclosure and verification point rather than, by itself, evidence of deception. A valid domain-validated certificate and established registration continuity are useful technical and historical signals, but neither proves legal ownership or regulatory standing.

#### EVIDENCE

- The homepage and contact content identify Netpak Hijyen Ve Kokulandırma Sistemleri A.Ş. and link to privacy, quality, environmental, sustainability, and related policy pages.
- Hosted on AS42807, AEROTEK-AS - CIZGI TELEKOMUNIKASYON ANONIM SIRKETI, TR.
- TLS certificate: RapidSSL TLS RSA CA G1, DV validation, valid to 2026-11-24T23:59:59+00:00.
- The site's identity and policy pages contain no displayed licensing authority or license number.

### What to Verify Next

Before any purchase, account creation, credential submission, or financial commitment, an independent registry check should confirm that the legal entity shown on the site is active and connected to the stated business and address. Any product-specific compliance obligations for cleaning chemicals and scenting equipment should be confirmed through the relevant Turkish authorities or recognised commercial documentation. Contact and payment instructions should be validated through an independently sourced channel, and transactions should use payment protections that permit dispute or recovery.

#### EVIDENCE

- The legal and contact pages provide the entity information to compare against an independent corporate registry.
- The product-category pages identify the goods and services whose commercial and compliance documentation should be requested.
- The policy pages provide the stated governance documents for comparison with independently obtained company materials.

Summary Verdict

The overall posture is low trust with a material sensitive-interaction risk. The site appears commercially coherent, but the confirmed external reputation contradiction and incomplete independent identity linkage prevent it from being treated as a reliable basis for sensitive engagement.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the origin environment, and the observed address was an edge address rather than an identified origin. This infrastructure reduces some attack-surface exposure but does not validate the site’s operator or offset the external reputation findings.

Closing Assessment

The appropriate operating posture is read-only until the external reputation issue and the site’s real-world business identity have been independently resolved; credentials, payments, and other sensitive actions should not be performed in the interim.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

  - The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE
- 02 Sensitive Interaction Risk

  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of carpex.com.tr.

- The request stayed on carpex.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED

- The registration is paid up to 2028-08-08. CLEAR
- The earliest public archive of this site is from 2010-11-08. CLEAR
- It is hosted on AEROTEK-AS, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about carpex.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
