Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Carrie Elizabeth Jewellery is an established UK-oriented ecommerce website selling jewellery, watches, wedding pieces, personalised items, bespoke designs and gift cards at displayed prices, supported by promotions, customer reviews, warranty coverage, delivery and returns information, and payment options including Klarna.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive investment claims or other scam signals were observed. The long-established domain and continuous archival record align with the current retail identity, while external reputation checks and controlled interaction testing found no malicious classification, cloaking, hidden forms, suspicious scripts or unauthorised external data transmission.

- The domain record shows registration on 20 November 2014 (~11.7 years old) through GoDaddy.com, LLC, with expiry on 20 November 2026.
- The website has 199 archive snapshots spanning 6 November 2015–3 July 2026 (12 years tracked), with no suspicious repurposing or semantic drift identified.
- External threat-intelligence assessment recorded 0 malicious and 0 suspicious detections; the site was also clear of search-browser security warnings and external blacklist findings.
- Two successful behavioural tests of the homepage observed no cloaking, hidden forms, suspicious inline scripts, clipboard manipulation or external POST/XHR activity.

Regulatory Verification Notes

The site presents an ordinary consumer-retail model rather than a financial, brokerage or crypto service, so the evidence does not establish a need for financial-services authorisation. Available homepage material describes customer-service policies and warranty arrangements, but the supplied page evidence does not conclusively establish the legal entity particulars behind the trading name; this is a limited disclosure-verification point, not

evidence of impersonation or misconduct. No matching third-party broker profile was identified, which has no meaningful adverse implication for a jewellery retailer.

- The homepage categorises the operation as jewellery ecommerce and contains no cryptocurrency, investment-return, brokerage or wallet-connect functionality.
- The homepage presents shipping, returns and warranty information as part of the customer proposition.
- The site is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- The site’s transport encryption uses a valid DV TLS certificate issued by YE2, valid until 24 October 2026.

What to Verify Next

For material purchases, the purchaser should confirm the merchant’s legal name and applicable trading details from the checkout documentation, review the precise returns and warranty conditions for the selected item, and determine whether bespoke or personalised goods carry different cancellation rights. Final pricing, delivery charges and any Klarna obligations should be checked before authorising payment, while official customer-service channels may be independently confirmed if post-sale assistance is important.

- The homepage advertises displayed product pricing, gift cards, promotional discounts and a summer sale of up to 50%.
- The homepage offers personalised products and bespoke design services, categories that may carry product-specific fulfilment or return conditions.
- The homepage identifies multiple payment methods, including Klarna.
- The only detected homepage form is an optional email-or-phone marketing subscription with no untrusted submission destination.

Summary Verdict

The website is legitimate, established and trustworthy. Its identity continuity, clean security reputation, mature retail content and benign observed behaviour converge on a high-confidence posture with no contradictory risk signals. Normal browsing, account login and standard purchasing activity are appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the site through a single observed edge address, while the underlying origin was not exposed during the assessment. This reduces direct origin-server exposure and provides a useful security mitigation, although protective infrastructure is not itself proof of business legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying routine ecommerce care by reviewing the final order, fulfilment conditions and payment terms before completing a purchase.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of carrieelizabeth.co.uk.

- The request stayed on carrieelizabeth.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. [Tag = GODADDY]. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-20. NOTED
- The earliest public archive of this site is from 2015-11-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about carrieelizabeth.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
