

Is carriermasr.com a scam? TrustSniffer's high-risk assessment: 0/100

carriermasr.com

Verdict

0

OUT OF 100

CRITICAL RISK

carriermasr.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A Namecheap-hosted domain parking page indicating carriermasr.com registration has expired, with instructions to renew and links to domain auctions. No login, payment collection, or financial promises present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	4 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	100% confidence AbuseIPDB, 1 report; shared hosting inflates reports	RISK
Domain age	1.1 years old Registered history	CLEAR

The page as captured

<https://carriermasr.com/>

What carriermasr.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

carriermasr.com currently presents a Namecheap domain-parking page stating that the registration has expired, offering renewal instructions for the prior registrant and links to Namecheap domain auctions rather than presenting an operating business, product, or customer service.

Scam/Impersonation Risk

The domain is **blacklisted** by two external sources, with four malicious detections and one additional suspicious detection, including a Tier-1 threat detection. These findings constitute a direct contradiction to the otherwise benign appearance of the homepage. The page itself contains no login form, sensitive form, payment collection, financial promise, or detected brand-impersonation content, and its stated function is ordinary domain parking; however, the external threat detections and blacklist status require a clearly security-forward posture. One abuse report also applies to the hosting IP, although the attribution identifies shared infrastructure rather than a domain-specific finding.

EVIDENCE

- Homepage: identifies the domain as expired and provides domain-renewal and auction-related content, with no login or sensitive form detected.
- External reputation telemetry: 4 malicious detections, 1 suspicious detection, and blacklist status from 2 external sources.
- Hosting-IP reputation: 1 abuse report against 104.219.250.37, attributed to shared Namecheap infrastructure.

Regulatory Verification Notes

The available page is a parked-domain notice, not an operating financial or commercial service, and it does not present a legal entity, licensing claim, registration number, or regulated-business disclosure. This is a transparency and classification gap rather than independent proof of misconduct, but it means there is no on-page basis for connecting the domain to a verified real-world operator. The available broker-reputation context contains no match. Registration information identifies Namecheap Inc. as registrar and a privacy service as the listed organization; this is an administrative registration detail, not evidence of legitimacy. Transport security is present, but the certificate provides domain validation only.

EVIDENCE

- WHOIS telemetry: registered 2025-07-17, approximately 1.09 years old, expiring 2027-07-17; registrar: NAMECHEAP INC.
- Hosting telemetry: served from AS22612, NAMECHEAP-NET — Namecheap, Inc., US.
- TLS telemetry: certificate issued by YE1, validation level DV, valid to 2026-11-08.
- Homepage: no legal-entity, licensing, or regulated-service disclosure is presented.

What to Verify Next

Before any sensitive interaction, independently confirm that the intended domain is correct and that any domain-renewal activity is initiated by navigating directly to the official Namecheap service rather than relying on a page link. If the domain is being considered for a business or regulated service, obtain the operator's legal name and independently confirm any claimed registration or license with the relevant official registry. Confirm official support channels through an independent route and review the destination of every link before following it.

EVIDENCE

- Homepage: directs registrants toward Namecheap account renewal and domain-auction pathways.
- Homepage: contains no business-service, operator-identity, or licensing information on which to base independent verification.
- Page behavior: no wallet connection, wallet-sensitive activity, hidden form, or password-external form was detected during observation.

Summary Verdict

The overall posture is **critical trust risk**, with the domain unsuitable for login, credential submission, or financial interaction. Its apparent parked-page function does not resolve the material external reputation contradiction,

and the real-world operator identity remains unverified.

Infrastructure Integrity

The domain resolves directly through Namecheap infrastructure rather than a detected CDN, with two likely origin IPs and no edge IPs identified. This provides limited infrastructure context but no protective mitigation sufficient to offset the external reputation findings.

Closing Assessment

Prospective users should restrict activity to passive observation and avoid authentication, credential submission, or financial transactions through this domain; any legitimate renewal matter should be handled through an independently accessed official registrar account.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 104.219.250.37 (Namecheap, Inc., Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of carriermasr.com.

- The request stayed on carriermasr.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-17. NOTED
- The earliest public archive of this site is from 2013-06-18. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about carriermasr.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
