

Is cartaodetodos.com.br legit? TrustSniffer's high-trust assessment: 80/100

cartaodetodos.com.br

Verdict

80

OUT OF 100

HIGH TRUST

cartaodetodos.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Promotional website for 'Cartão de TODOS', a Brazilian discount/membership card offering healthcare discounts, cashback, partner benefits and promotional sweepstakes. Contains forms to request the card and collects personal details (name, email, WhatsApp, CPF). Regulated-promotion text references SUSEP and partnering companies.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Cartão de TODOS is a Brazilian promotional membership website presenting a discount card for healthcare, teleconsultation, medicines, cashback, partner benefits, educational content, and promotional prizes, with revenue apparently derived from recurring membership fees and commercial partnerships.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, blacklist, malicious-reputation, or conflicting-identity indication. The homepage presents a coherent membership and discount-card proposition, while behavioral testing identified two suspicious inline scripts, external network activity, and console errors; these are implementation-level observations rather than evidence of credential theft or impersonation because no cloaking, hidden forms, password-external submissions, wallet activity, or brand-impersonation indicators were detected. The site's long registration continuity, substantial archival record, and clean external reputation materially support an established-site interpretation, although the real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration record: created 2011-12-19; approximately 14.65 years old.
- Web archive: 328 snapshots spanning 2012–2026, with 15 years tracked and a maximum observed gap of 1 year.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit.
- Behavioral testing: 2 suspicious inline scripts, 18 console errors, 30 non-whitelisted external requests, no hidden forms, and 0 wallet or password-external-form activity.

Regulatory Verification Notes

The homepage describes a subscription membership offering with consultations advertised from R\$30, other medical areas from R\$40, and membership priced at R\$33.40 per month. It also promotes recurring prize opportunities, including a claim that members may compete for a new house each week, and references SUSEP and partnering companies in connection with the promotion. The site collects name, email, WhatsApp, and CPF

through its lead-capture form. These disclosures provide substantive business-model detail, but the available material does not independently verify a regulatory authorization or registration number for the specific operator or promotion; the SUSEP reference should therefore be treated as an on-page claim requiring registry confirmation, not as proof of authorization. The available corporate attribution identifies TODOS EMPREENDIMENTOS LTDA, while independent connection between that entity and the website is not verified.

EVIDENCE

- Hosting telemetry: served from AS14618, AMAZON-AES — Amazon.com, Inc., US.
- Transport security: TLS certificate issued by YE2 at DV validation level, valid to 2026-09-17.
- Homepage: one sensitive lead-capture/sign-up form requesting name, email, WhatsApp, and CPF.
- Homepage promotional content: recurring membership pricing, healthcare discounts, and prize-promotion references to SUSEP and partner companies.

What to Verify Next

Before credential or payment interaction, an independent check should confirm that TODOS EMPREENDIMENTOS LTDA is the merchant responsible for the service and that the displayed subscription, cancellation, refund, and recurring-payment terms correspond to the contracting entity. The applicable SUSEP registry or official regulatory channel should be checked independently for the promotion and its stated participating companies. Contact channels should also be confirmed through an independently sourced route, and payment methods should provide ordinary consumer dispute and protection mechanisms.

EVIDENCE

- Merchant-identity check: compare the contracting entity shown in checkout, invoices, and payment records with the corporate attribution presented for the service.
- Regulatory check: validate the promotion's stated SUSEP basis through the relevant official registry rather than relying solely on the homepage reference.
- Consumer-protection check: review the service's cancellation, refund, recurring-billing, and complaint-handling terms before enrollment.
- Contact-channel check: confirm official support details through an independent source before submitting personal information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture and no observed scam or impersonation contradiction. The classification is well supported by converging historical, content, reputation, and technical signals, while the operator's real-world identity remains unverified and prevents an unqualified identity conclusion.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, and the observed address was an edge address with no origin candidate identified in this analysis. This reduces direct exposure of the origin environment and is a mitigating security control, but infrastructure protection alone does not establish operator legitimacy.

Closing Assessment

Ordinary use may proceed with proportionate care, provided independent merchant-identity, regulatory, cancellation, and payment-protection checks are completed before submitting credentials or initiating payment.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cartaodetodos.com.br.

- The request stayed on cartaodetodos.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-63.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-19. NOTED
- The earliest public archive of this site is from 2012-02-06. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cartaodetodos.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
