

Is cartpe.in legit? TrustSniffer's high-trust assessment: 100/100

cartpe.in

Verdict

100

OUT OF 100

HIGH TRUST

cartpe.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 60%.

What this site appears to be

Cartpe.in promotes a hosted ecommerce website builder offering rapid store creation, responsive storefronts, inventory tools, analytics, checkout optimization, custom domains, themes, and messaging features. The page includes testimonials, support contact information, and links to terms and privacy policies.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Cartpe.in is a hosted ecommerce website-builder platform presenting rapid online-store creation, storefront design, inventory management, analytics, checkout optimization, custom domains, themes, and business messaging for merchants.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The site presents a coherent SaaS business model, with customer testimonials, support details, and standard legal-policy links; its claims concern ecommerce tooling rather than financial returns or other manipulation. Normal account login and standard platform use are appropriate.

- The homepage describes ecommerce website creation, inventory tools, analytics, checkout optimization, themes, custom domains, and email/SMS messaging.
- The homepage contains no detected phishing, impersonation, hidden-form, wallet-drainer, or suspicious-script indicators.
- Domain registration records show registration on 2024-02-10, with an age of approximately 2.47 years.
- Web-archive records contain 44 snapshots spanning 2024–2026, covering 3 tracked years.

Regulatory Verification Notes

Cartpe's pages link to terms and privacy policies and identify a conventional hosted software service. The available content does not present a financial-services license claim or licensing number; for this apparent ecommerce SaaS model, that is a transparency item for commercial due diligence rather than evidence of wrongdoing. Registration information identifies Ever Green Impex through NAMECHEAP INC, while the site's clean external reputation and established operating history support its legitimacy.

- Registration records identify NAMECHEAP INC as registrar and Ever Green Impex as the organization.
- The site is hosted on AS16509 (Amazon.com, Inc., US).
- TLS uses the Amazon RSA 2048 M01 issuer with DV validation and is valid through 2027-01-10.
- External reputation checks recorded zero malicious and zero suspicious detections; the site is within the global top one million by traffic rank.

What to Verify Next

Before procurement or subscription, confirm the contracting entity, applicable business registration, service terms, pricing, billing arrangements, and official support channels through independent business records and the published legal pages.

- The homepage provides links to terms and privacy policies.
- Pricing details are not visible in the supplied page content.
- The homepage provides support contact information and customer testimonials.

Summary Verdict

Cartpe.in presents as a legitimate, established, and trustworthy ecommerce SaaS provider. The available evidence supports normal interaction, including account login, account actions, and standard service use.

Infrastructure Integrity

The site operates from Amazon cloud infrastructure with valid Amazon-issued TLS protection. This is a conventional and mitigating hosting posture, although cloud hosting alone does not independently establish business legitimacy.

Closing Assessment

Prospective customers may proceed with normal use while completing ordinary commercial due diligence appropriate for any software subscription.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cartpe.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
