

Is casascamijanes.com a scam? TrustSniffer's high-risk assessment:
0/100

casascamijanes.com

Verdict

0

OUT OF 100

CRITICAL RISK

casascamijanes.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language website for Casas Camijanes, a construction and renovation firm offering bespoke houses, passive-house design, rehabilitations and turnkey project services. Provides contact emails and phone numbers and includes legal/privacy/cookie notices.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://casascamijanes.com/>

What casascamijanes.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Spanish-language website presents Casas Camijanes as a local construction and renovation business offering bespoke residential design and construction, passive-house projects, rehabilitation, reforms, treated-wood work, and turnkey delivery through direct client engagement.

Scam/Impersonation Risk

The site's homepage presents a coherent construction-service proposition, including custom homes, Passivhaus design, rehabilitation, and renovation work, with no observed login form, wallet functionality, deceptive redirects, or page-level phishing indicators. However, this benign presentation is contradicted by **confirmed blacklisting** and multiple external malicious detections, including nine malicious and one suspicious assessment, with one Tier-1 security vendor flagging the domain. The contradiction is therefore materially more significant than the site's professional appearance, and sensitive interaction should be treated as unsafe pending independent validation.

EVIDENCE

- Homepage: Presents Casas Camijanes as a construction and rehabilitation firm and contains no observed phishing, login, or cryptocurrency indicators.
- External reputation telemetry: 9 malicious and 1 suspicious detections were recorded across 15 evaluated assessments; a Tier-1 vendor also flagged the domain.
- External reputation telemetry: The domain is recorded on two external blacklist sources.
- Registration record: Registered 2002-09-27T06:50:54Z and approximately 23.92 years old.

Regulatory Verification Notes

The legal, privacy, and cookie notices provide a basic compliance presentation, but the supplied site content does not state a licensing claim or licensing number. This is a regulatory-transparency gap requiring direct verification, not by itself evidence of fraud. The available evidence does not independently verify that the operator behind the Casas Camijanes presentation is the same entity named in the registration record. The domain is registered through Hosting Concepts B.V. d/b/a Registrar.eu, with Abanillas s.l. recorded as the organization; registration privacy is an administrative limitation rather than a standalone security finding.

EVIDENCE

- Registration record: Registrar is Hosting Concepts B.V. d/b/a Registrar.eu; organization is listed as Abanillas s.l.; expiration is 2026-09-27T06:52:21Z.
- Hosting telemetry: Served from AS16276 (OVH - OVH SAS, FR).
- Transport security: TLS certificate issued by YR1 at DV validation level, valid to 2026-11-17T14:07:21+00:00.
- Legal and privacy pages: Legal, privacy, and cookie notices are present, but no license number is identified in the supplied content.

What to Verify Next

Before any contract, deposit, document exchange, or other sensitive interaction, the prospective counterparty should be confirmed through an applicable corporate or construction-sector registry using independently sourced contact details. The contracting entity, authority to provide the services, insurance or permit requirements, payment beneficiary, written scope of work, refund terms, and dispute process should be documented and checked through an offline or independently obtained channel. Any request for credentials or financial information should remain deferred until those checks are complete.

EVIDENCE

- Legal and contact pages: Request the full contracting-entity details and supporting documentation rather than relying solely on the site presentation.
- Proposed transaction documentation: Reconcile the named beneficiary, contract terms, invoice details, and payment destination through an independent channel.
- Regulatory verification: Confirm any applicable registration, licensing, permit, or insurance requirements with the relevant authority before commitment.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction at this time. Although the website presents a credible-looking local-services model and has some established technical characteristics, the confirmed external contradiction controls the assessment, while the real-world operator remains unverified.

Infrastructure Integrity

CDN/WAF protection is present, and the observed address is an edge address rather than an independently observable origin. This provides a mitigating layer against direct exposure, but protective infrastructure does not establish legitimacy and cannot offset the external reputation concern.

Closing Assessment

Prospective users should restrict activity to passive review until independent identity, regulatory, contractual, and payment-channel checks have been completed, and should not submit credentials or initiate financial transactions beforehand.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of casascamijanes.com.

- The request stayed on casascamijanes.com. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by sered.net, across 4 name servers. NOTED
- The registration is paid up to 2026-09-27. NOTED
- The earliest public archive of this site is from 2004-03-10. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about casascamijanes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
