

Is casasmediterraneas.com safe? TrustSniffer's low-trust assessment: 25/100

casasmediterraneas.com

Verdict

25

OUT OF 100

LOW TRUST

casasmediterraneas.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-23 by automated analysis. Classification confidence 75%.

What this site appears to be

A Spanish-language regional real estate agency site (Casas Mediterráneas) listing properties for sale/rent in Tarragona/Costa Dorada with search filters, prices, and contact details. Contains login and password-reset UI elements; primary interactions are offline inquiries and lead generation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://casasmediterraneas.com/>

What casasmediterraneas.com served when TrustSniffer captured it on 2026-09-23. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Spanish-language regional real-estate agency platform presenting property listings for sale and rent in Tarragona and the Costa Dorada, with search filters, advertised prices, agency contact details, and account-access functions intended to support property enquiries and lead generation.

Scam/Impersonation Risk

The site's visible content resembles a conventional property agency and contains no detected brand impersonation, conflicting legal names, or page-level phishing indicators. However, this benign presentation is outweighed by confirmed external threat detections and a blacklist hit, including multiple malicious classifications. The site also exposes login and password-reset functions, while interaction testing recorded substantial document changes after user activity; these factors create a high-risk environment for credentials and sensitive transactions. A single abuse report associated with shared IONOS infrastructure is discounted because it applies to shared provider infrastructure, but that attribution does not offset the domain-level reputation findings. The available evidence does not establish the real-world operator's identity.

EVIDENCE

- The homepage presents property sales and rentals, agency contact details, and login and password-reset forms.
- External reputation checks recorded 9 malicious and 4 suspicious detections, with a confirmed blacklist hit.
- The interaction record measured a maximum post-interaction DOM difference of 10,908 and 3 console errors across 2 successful runs.
- Domain history records 224 archive snapshots spanning 2003–2026, while the registration record states 2022-11-11 and an age of approximately 3.87 years; this provenance discrepancy requires resolution.

Regulatory Verification Notes

The site presents itself as a regional real-estate agency, but the available business information does not state a licensing authority or license number. That is a regulatory-disclosure gap rather than, by itself, proof of fraud. Independent identity verification remains incomplete, and the absence of a matched third-party broker profile provides no additional reputational support. Transport security and conventional hosting are present, but a domain-validated certificate confirms encryption only and does not validate the operator or its authority to broker property transactions.

EVIDENCE

- The homepage identifies “Casasmediterraneas” as a Costa Dorada real-estate agency and provides sales, rental, contact, and account-access functions.
- No license authority or license number is stated in the available agency content.
- The domain registration record lists IONOS SE as registrar, with creation date 2022-11-11T11:57:07Z and expiration date 2026-11-11T11:57:07Z.
- The site is hosted on AS8560, IONOS-AS - IONOS SE, DE; its TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2026-11-15.

What to Verify Next

Before any credential submission, property deposit, payment, or exchange of identity documents, the prospective party should independently confirm that the agency and each advertised property are genuine through an offline contact route and authoritative Spanish property or business records. The agency's authorization status should be checked with the relevant regional authority, and payment instructions should be validated against independently obtained contact details rather than information supplied solely through the website. Account credentials should not be reused elsewhere, and any transaction should use payment protections appropriate to the value and nature of the engagement.

EVIDENCE

- The homepage supports offline property enquiries and displays agency contact details, making independent confirmation of the counterparty and listing ownership practicable.
- The available disclosure does not identify a licensing authority or registration number, so authorization should be confirmed through the relevant official registry.
- The site includes login and password-reset functions, making independent confirmation of the service's account-support channels necessary before credential use.

Summary Verdict

The website has a **low-trust posture** because strong external threat and blacklist signals materially outweigh its conventional real-estate presentation and functioning encrypted transport. Its apparent business purpose is plausible, but the operator's identity is unverified and the evidence is not sufficient to support sensitive interaction.

Infrastructure Integrity

The site is positioned behind CDN/WAF infrastructure, with observed addresses associated with AS8560 and IONOS SE; the origin server was not observable in this analysis. This reduces direct exposure of the origin and is a mitigating infrastructure characteristic, but it does not establish legitimacy or neutralize the external reputation findings.

Closing Assessment

Treat the site as unsuitable for login, credential submission, deposits, or other sensitive transactions unless the agency, its authority, property ownership, and payment arrangements have first been confirmed through independent channels.

Written analysis generated 2026-09-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 2001:8d8:100f:f000::200 (1&1 IONOS SE, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of casasmediterraneas.com.

- The request stayed on casasmediterraneas.com. It was not redirected to another domain. CLEAR
- Registration is published under IONOS SE. CLEAR
- DNS for this domain is served by ui-dns.de, across 4 name servers. NOTED
- The registration is paid up to 2026-11-11. NOTED
- The earliest public archive of this site is from 2003-02-18. CLEAR
- It is hosted on IONOS-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about casasmediterraneas.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
