Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Brazilian e-commerce storefront selling furniture, appliances, electronics, mattresses, and household goods directly to consumers through a real-denominated product catalogue, customer-account access, and a shopping cart.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation signals were observed. The commercial presentation is internally consistent with a conventional retail business: product categories, prices, account functions, and purchasing mechanics align with the registered owner's furniture-trade name. Its established domain tenure, top-million traffic presence, and clean assessment across the evaluated external threat sources provide convergent evidence that this is a legitimate operating storefront rather than a recently created imitation.

- The homepage presents a coherent physical-goods catalogue covering furniture, major appliances, consumer electronics, mattresses, and household utensils, with prices in Brazilian reais and an active cart.
- The domain was registered in 2020 and is approximately 6.49 years old; its registration identifies "atacado dos moveis eireli" as the owner and runs through 2031-02-04.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no abuse reports, and no signature matches.
- The domain is included within the global top million at traffic rank 788,059.

Regulatory Verification Notes

The site presents an ordinary retail model rather than a financial, investment, or other specially regulated service. Its homepage provides links to exchange, privacy, and terms policies, supporting normal consumer-commerce governance. The supplied page evidence does not establish the detailed legal contents of those policies or show a specialist regulatory authorization; this is a limited disclosure-verification matter, not evidence of deception. No third-party broker profile was matched, which is unsurprising for a furniture and home-goods retailer and carries no adverse regulatory implication.

- The homepage visibly links to exchange, privacy, and terms policies for the retail service.
- The homepage identifies the business as "Atacadão dos Móveis," consistent with the registrant name associated with the domain.

- The assessed business model is direct-to-consumer sale of physical merchandise rather than brokerage, investment, or cryptocurrency activity.
- No broker-intelligence record matched the assessed retailer.

What to Verify Next

For material purchases, standard transaction due diligence should include confirming the final price, freight terms, delivery timetable, return conditions, warranty coverage, and the merchant name that will appear on the payment record. Official contact channels may also be confirmed independently before arranging unusually large orders or nonstandard payment terms.

- The observed homepage includes product pricing, customer-account access, and cart functionality, making checkout terms and payment attribution relevant transaction checks.
- Automated interaction completed successfully in both observed runs, with stable page delivery and no detected cloaking.
- No hidden form, externally hosted password form, wallet interaction, clipboard manipulation, or fingerprinting behavior was detected.
- All observed external form submissions and data requests used recognized destinations; none were classified as non-whitelisted.

Summary Verdict

The website is a legitimate, established, and trustworthy retail property with consistent commercial identity, credible operating history, clean external reputation, and benign observed behavior. The evidence supports normal interaction, including account login and standard purchases.

Infrastructure Integrity

The site is served through Amazon infrastructure with AWS CDN/WAF protection. The observed address was an Amazon edge endpoint and no origin candidate was exposed; this reduces direct infrastructure exposure but is treated as a security control rather than independent proof of legitimacy. Transport encryption was valid and domain-validated at the time assessed.

- The hosting infrastructure is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The observed AWS edge address was 54.233.181.219; all observed addresses were classified as CDN edge infrastructure.
- The TLS certificate was issued by YR1 with DV validation and was valid through 2026-09-24.

Closing Assessment

Prospective customers may use the site normally, applying customary retail precautions for order details, payment records, and fulfillment documentation, particularly for high-value purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [catalogoatacadaodosmoveis.com.br](#).

- The request stayed on [catalogoatacadaodosmoveis.com.br](#). It was not redirected to another domain.

CLEAR

- DNS for this domain is served by [dns.br](#), across 2 name servers. NOTED
- The registration is paid up to 2031-02-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [catalogoatacadaodosmoveis.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
