Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a South African ecommerce retailer presenting commercial catering and kitchen equipment at rand-denominated prices, with cart-based ordering, nationwide delivery, store collection, monthly promotions, and optional equipment finance through a named rental partner.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious reputation findings, or deceptive investment features were observed. The domain has a long-established and continuous history, while the homepage presents a coherent retail operation with physical products, ordinary purchasing mechanics, contact details, store hours, and a Centurion address. Observed browser behaviour showed no cloaking, hidden forms, credential harvesting, wallet interaction, clipboard manipulation, or suspicious inline scripts.

- Domain-registration records identify fushia designs as the registrant through ZA-DNS; registered 28 May 2014 (~12.18 years old), with expiry on 28 May 2027.
- Web-archive records contain 237 snapshots spanning 2 August 2014–13 February 2026 (13 years tracked), with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, 0 abuse reports, and no matched threat signatures.
- The homepage contained no login form, hidden form, sensitive form, brand-impersonation indicator, or cryptocurrency feature.

Regulatory Verification Notes

The site presents itself as an equipment retailer rather than a regulated financial or investment service. No licence claim or licence number is presented in the supplied homepage evidence; for this business model, that absence does not indicate impersonation or fraud. The optional equipment-finance arrangement should be understood as a partner-facilitated service, with the applicable contractual and regulatory disclosures assessed at the point of application. The published trading details and registration attribution provide a consistent operating identity, although the evidence does not establish the legal terms governing purchases, returns, warranties, or finance.

- The homepage identifies the business as Catering Shop Online and publishes a Centurion street address, telephone and WhatsApp channels, store hours, delivery and collection options, and product prices in South African rand.

- The homepage describes optional equipment finance through a named third-party rental company without claiming that the retailer itself is a licensed financial institution.
- The site's transport encryption uses a YE1-issued domain-validated certificate, valid to 21 October 2026.
- The homepage is implemented as a WooCommerce/WordPress ecommerce storefront and presents cart-based ordering for tangible commercial equipment.

What to Verify Next

For procurement or material transactions, the contracting entity, tax documentation, warranty terms, return policy, stock availability, and payment beneficiary should be matched to the order documentation. Any finance application should be checked directly against the named finance partner's official terms, identity, affordability process, and complaint arrangements. Official contact channels and the Centurion trading location may be independently confirmed before a first substantial order.

- The homepage offers nationwide delivery and store collection, making delivery scope, collection procedures, and acceptance conditions relevant to purchase validation.
- The product catalogue covers bakery, butchery, refrigeration, gas, party, processing, catering, table-and-sink, forklift, and combination-deal categories.
- The supplied page evidence describes prices, specials, and ordering mechanics but does not include the underlying purchase, warranty, returns, or finance-contract terms.
- No third-party broker profile matched the business, which is consistent with its presentation as an equipment retailer rather than a brokerage.

Summary Verdict

The website is a legitimate, established, and trustworthy ecommerce operation. Its coherent commercial identity, sustained provenance, clean external reputation, and benign observed behaviour converge strongly in support of normal interaction, including account login and standard transactions.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, and all four observed addresses were edge servers rather than exposed origin infrastructure. This reduces direct origin exposure and provides a conventional protective layer, but is treated as a security mitigation rather than independent proof of legitimacy.

- Hosting was observed on AS13335 (CLOUDFLARENET – Cloudflare, Inc., US), with four Cloudflare edge addresses and no origin candidate identified.

Closing Assessment

Normal browsing, account use, and ordinary purchasing are appropriate, with standard procurement controls applied to substantial first-time orders or third-party finance arrangements.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [cateringshoponline.co.za](#).

- The request stayed on [cateringshoponline.co.za](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under ZA-DNS. [CLEAR](#)
- DNS for this domain is served by [cloudflare.com](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-28. [NOTED](#)
- The earliest public archive of this site is from 2014-08-02. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [cateringshoponline.co.za](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
