Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Amanda's Place is a vacation-rental website for four accommodations in Caye Caulker, Belize, presenting property descriptions, amenities, local travel information, guest reviews, and booking contact details for direct short-term stays and related tourism services.

Scam/Impersonation Risk

The site's visible content is consistent with a small hospitality business: the homepage and accommodation pages describe the Green Studio, Yellow Studio, Casa Amancer, and Casita Carinosa, while the contact and local-information material supports a vacation-rental purpose. The site contains no detected login form, wallet connection, hidden sensitive form, or stated brand-impersonation indicators. However, this otherwise coherent presentation is outweighed by confirmed blacklist status and external malicious detections, creating a material risk for payments, credential submission, or other sensitive interaction. No identity contradiction was observed, but the site's apparent business model does not explain or neutralize the external reputation conflict.

EVIDENCE

- Domain registration record: registered 2009-08-03 and approximately 17.05 years old; registrar listed as Launchpad.com Inc.
- Web-archive record: 181 snapshots spanning 2011–2026, covering 16 tracked years.
- External reputation telemetry: 2 malicious detections and 1 suspicious detection; confirmed blacklist entries from 2 sources.
- Homepage and accommodation pages: hospitality content for four named vacation rentals, with no detected login, wallet, or hidden sensitive form.

Regulatory Verification Notes

The website presents a direct accommodation-booking model and does not claim to be a regulated financial or investment service. The supplied site content does not identify a clearly stated legal entity, accommodation licence, tourism registration, or registration number; this is a regulatory and disclosure gap rather than, by itself, proof of fraud. The available identity evidence supports only a likely connection to a real-world hospitality operation, not independently verified operator identity. A valid transport-encryption certificate and identifiable hosting infrastructure are positive technical controls, but they do not establish legal authority or business legitimacy.

EVIDENCE

- Homepage, FAQ, and contact navigation: presents Amanda's Place as a vacation-rental business but does not provide a stated licence or registration number in the supplied content.
- Site transport encryption: TLS certificate issued by YE1, validation level DV, valid to 2026-11-01.
- Hosting infrastructure: served from AS16276 (OVH - OVH SAS, FR).
- Third-party broker-context check: no matching broker record was identified; this is not a licensing or regulatory determination.

What to Verify Next

Before any booking or payment, independently confirm that the advertised properties and operator exist through an offline or independently sourced local contact, and confirm the applicable Belize accommodation or tourism registration with the relevant authority. Booking terms should be checked for cancellation, refund, and dispute provisions, and any payment should use a method offering documented buyer protection rather than an irreversible transfer. Independent confirmation of the official contact channels and the property's current operating status is also appropriate.

EVIDENCE

- Accommodation pages: provide property-specific descriptions that can be compared with independently sourced location and ownership information.
- Contact page: provides the site's stated booking channels for comparison against independently obtained contact details.
- FAQ and useful-information pages: provide the material from which cancellation, booking, and service conditions should be confirmed before payment.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears operational and its content is internally coherent, but the confirmed external reputation conflict prevents the available evidence from supporting normal confidence in transactions or other sensitive use. Identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed edge address 15.235.75.6 associated with AS16276 and OVH - OVH SAS, FR; the origin server was not observable. This reduces direct exposure of the origin and is a mitigating infrastructure signal only, not evidence that the operator or booking activity is legitimate.

Closing Assessment

Until the operator, property, applicable registration, and payment protections have been independently confirmed, interaction should remain limited to passive review and non-sensitive enquiries; credentials and payment details should not be submitted.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cayecaulkerkasita.com.

- The request stayed on cayecaulkerkasita.com. It was not redirected to another domain. CLEAR
- Registration is published under Launchpad.com Inc.. CLEAR
- DNS for this domain is served by guruwebhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-03. NOTED
- The earliest public archive of this site is from 2011-02-02. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cayecaulkerkasita.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
