

Is cchomenurses.com legit? TrustSniffer's high-trust assessment: 100/100

cchomenurses.com

Verdict

100

OUT OF 100

HIGH TRUST

cchomenurses.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Local home health agency (Continuity Care Home Nurses) offering nursing, therapy and in-home caregiving services with contact numbers, office address, accreditations and testimonials. Site focuses on service description and patient/family information rather than financial or credential-collection flows.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What cchomenurses.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Continuity Care Home Nurses is a local home-health-care website presenting nursing, therapy, and in-home caregiving services for patients, families, and referral sources, with the apparent business model of arranging care funded through insurance, workers' compensation, long-term-care insurance, and private payment.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent healthcare-service model rather than investment, cryptocurrency, or credential-collection activity: it describes pre-admission nursing assessments, insurance evaluation, care coordination, therapy, caregiving, regional service coverage, and patient testimonials. The available behavioral evidence is consistent with that presentation, with no login form, hidden sensitive form, external posting activity, wallet interaction, cloaking, or suspicious script behavior detected. The domain also has a long registration history and sustained historical presence, supporting apparent continuity rather than recent opportunistic creation. The real-world operator identity remains independently unverified, so the site should be characterized as apparently legitimate rather than identity-proven.

EVIDENCE

- The homepage identifies Continuity Care Home Nurses, states that it has helped patients and families since 1991, and provides nursing, therapy, caregiving, insurance, and referral information.
- Browser observation recorded no login form, hidden form, sensitive form, external XHR or POST activity, wallet-provider activity, or cloaking across 2 successful runs.
- Domain registration evidence: created 2003-10-16; age 22.86 years.
- Historical records span 2004–2026, covering 23 years tracked, with no suspicious repurposing or semantic category change identified.

Regulatory Verification Notes

The site presents itself as a licensed home-health agency and references accreditations including BBB and CAHSAH, while the contact and service material supplies regional telephone channels and an office address. These are useful on-site legitimacy indicators, but the supplied evidence does not independently verify a licensing authority or registration number; this is a regulatory-disclosure gap, not evidence of a scam. The available third-party broker context contains no match, and external reputation observations identified no malicious or suspicious detections, although reputation coverage was partial. The TLS and hosting records provide additional technical consistency, but neither establishes the legal identity of the operator.

EVIDENCE

- The homepage and service material describe the organization as licensed and reference BBB and CAHSAH accreditations.
- The homepage lists San Fernando Valley, Los Angeles, and Orange County service contacts and explains insurance, workers' compensation, long-term-care insurance, and private-pay arrangements.
- Hosting evidence: served from AS30447, INFB2-AS – Internet Names For Business Inc., Canada.
- Transport evidence: TLS certificate issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid to 2026-10-15T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, the prospective patient, family, or referral organization should independently match the agency's licensing claim and accreditation references against the relevant state or accrediting-body records. Independently sourced contact details should be used to confirm service eligibility, insurance billing, payment protections, and the applicable patient or customer policies before sensitive information or funds are exchanged.

EVIDENCE

- The site's licensing and accreditation statements appear in its healthcare-service presentation but are not accompanied in the supplied material by an independently verified registration identifier.
- The site describes insurance evaluation and private-payment arrangements, creating a clear basis for confirming coverage and payment terms through an independent channel.
- The site includes separate Home, About Us, Our Staff, Services Offered, Careers, and Contact Us navigation, providing pages against which organizational and service details can be cross-checked.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk healthcare provider website. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF edge, resolving to one likely origin address rather than a distributed edge network. This is a neutral infrastructure characteristic: it does not create a finding of maliciousness, but it also provides less intermediary shielding than a mainstream CDN deployment.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN vendor or trusted CDN was detected.

Closing Assessment

Normal informational use is proportionate to the assessment, while independent confirmation of the organization and payment arrangements should precede credential submission or payment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cchomenurses.com.

- The request stayed on cchomenurses.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by earthlink.net, across 2 name servers. NOTED
- The registration is paid up to 2026-10-16. NOTED
- The earliest public archive of this site is from 2004-04-04. CLEAR
- It is hosted on INFB2-AS, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cchomenurses.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
