Cedar Creek Clothing Optional Resort

What cedarcreekresort.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Cedar Creek Resort is an adults-only, clothing-optional hospitality and booking website presenting accommodation, rates, events, memberships, amenities, testimonials, and reservation options for a resort near Columbia, South Carolina. Its apparent business model is the sale of stays, memberships, rentals, and event attendance, supported by direct contact and online booking calls to action.

Scam/Impersonation Risk

No contradictions were observed. The homepage consistently presents Cedar Creek Resort as a hospitality business, and the available pages support that purpose through accommodation information, rates, policies, events, testimonials, contact details, and reservation pathways. The site does not display phishing characteristics, brand-impersonation indicators, hidden forms, or cryptocurrency-related mechanisms; observed interaction behavior was also assessed as benign. The domain and historical signals are consistent with an established online presence, although the real-world operator identity remains independently unverified.

Evidence:

- The homepage identifies "Cedar Creek Resort" and describes an adults-only, clothing-optional resort with accommodation and event offerings.

- The rates, accommodations, events, policies, about, membership, and reservations pages form a coherent internal business structure.
- The site's forms analysis identified reservation booking and newsletter/contact functions, with no login form, password-external form, hidden form, or wallet-connect activity.
- Registered 2016-08-15; domain age 10.02 years.

Regulatory Verification Notes

The site appears to operate as a conventional hospitality and event business rather than a regulated financial or investment service. Its legal and identity disclosure is unclear for purposes of independently connecting the website to a specific real-world operator, so the apparent legitimacy of the business should not be treated as independently proven. No licensing claim or registration number is presented in the supplied site evidence; for a resort, the relevant checks would ordinarily concern business identity, local operating requirements, payment terms, accommodation policies, and event arrangements rather than financial regulation. External reputation signals were clean where evaluated, and no broker-dataset match was identified. Evidence:

- The about and policies pages are present, but the supplied content does not establish an independently verified legal operator or regulatory registration.
- The homepage and booking materials describe paid reservations, memberships, rentals, and event attendance without presenting a financial-services licensing claim.
- Hosted on AS63410 (PRIVATESYSTEMS - PrivateSystems Networks, US).
- TLS certificate issued by YR2, DV validation, valid to 2026-10-04.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant identity associated with the resort, review cancellation and refund terms for reservations and events, and confirm that the payment method provides appropriate dispute and consumer-protection mechanisms. For a planned stay or event purchase, confirm availability, pricing, age requirements, and the applicable policies through contact channels obtained independently from the site itself. Evidence:

- The reservations, rates, accommodations, events, and policies pages identify the transaction areas requiring confirmation.
- The site offers direct contact and reservation calls to action rather than a conventional account-login workflow.
- The business model is hospitality booking and membership activity, making merchant identity, fulfilment, cancellation, and payment protections the relevant checks.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website presenting a coherent hospitality business and a low-risk online experience. The overall trust posture is high, while confidence in the independently verified real-world operator identity remains limited.

Infrastructure Integrity

The site resolves directly to one origin address hosted by PRIVATESYSTEMS - PrivateSystems Networks in the United States, with no CDN or WAF detected and no edge-IP layer identified. Its valid domain-validated TLS certificate provides transport protection, while the hosting arrangement is a mitigating technical signal rather than proof of business legitimacy.

Closing Assessment

The site is suitable for ordinary browsing and prospective booking consideration, provided that merchant identity, transaction terms, and payment protections are confirmed through independent routine checks before completing a paid or credentialed interaction.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	30%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cedarcreekresort.net.

- The request stayed on cedarcreekresort.net. It was not redirected to another domain. CLEAR
- Registration is published under DNC Holdings, Inc. CLEAR
- DNS for this domain is served by loraymedia.net, across 2 name servers. NOTED
- The registration is paid up to 2027-08-15. NOTED
- The earliest public archive of this site is from 2006-12-08. CLEAR
- It is hosted on PRIVATESYSTEMS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cedarcreekresort.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
