

Is celcoin.com.br legit? TrustSniffer's high-trust assessment: 80/100

celcoin.com.br

Verdict

80

OUT OF 100

HIGH TRUST

celcoin.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate website for Celcoin offering embedded finance infrastructure: BaaS, payments (including Pix), credit and escrow products, developer APIs and white-label solutions. Includes contact details, legal entity information and claims of Banco Central licensing and large transaction volumes.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is Celcoin's corporate B2B website, presenting embedded-finance infrastructure for businesses and fintech partners through banking-as-a-service, Pix and payment services, credit and escrow capabilities, developer APIs, and white-label financial solutions. Its apparent business model is enterprise platform, transaction, and service-contract provision rather than direct retail financial activity.

Scam/Impersonation Risk

No contradictions were observed. The available evidence does not indicate phishing, brand impersonation, malicious activity, or blacklist exposure, and the site's corporate presentation is consistent with an established financial-infrastructure business. The homepage and observed behavior also showed no login form, hidden sensitive form, wallet-connection activity, cloaking, clipboard manipulation, or suspicious inline scripting. The historical record supports continuity rather than repurposing, while the independently verified operator identity remains unresolved; accordingly, legitimacy is apparent and evidence-consistent, not proven as a matter of real-world identity.

EVIDENCE

- The domain registration record shows creation on 2014-08-26 and an age of 11.97 years, with expiry on 2027-08-26.
- The web archive records 561 snapshots spanning 2014-12-23 through 2026-05-19, covering 13 tracked years.
- The homepage and behavioral capture showed no login form, hidden sensitive form, wallet-connect execution, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The legal and contact material presents Celcoin as a corporate financial-infrastructure provider and includes legal-entity information and contact details. The site also presents a Banco Central licensing claim, but the supplied evidence does not independently verify a license number or registry entry; this is a regulatory-disclosure item for confirmation, not evidence of a scam. The available third-party reputational context contains no matching broker warning, and the overall content is professional, substantive, and directed toward enterprise partners. The domain registration record identifies "Integration Solutions To Business"; this is an administrative registration detail and does not independently establish the operating entity behind the website.

EVIDENCE

- The site's legal and contact pages provide legal-entity information and business contact details; the site presents a Banco Central licensing claim without an independently verified license number in the supplied evidence.
- The hosting record identifies AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-24T18:52:56+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise counterparty should independently match the contracting entity named in the applicable commercial documents with the relevant corporate and financial-services registries. The Banco Central licensing claim should be checked directly against the applicable official register, and contractual terms should be reviewed for service scope, liability, dispute handling, and payment protections. Contact channels should also be confirmed through an independently sourced corporate route rather than relying solely on information presented on the website.

EVIDENCE

- Regulatory and legal pages: confirm the named contracting entity and any claimed authorization against official records.
- Commercial terms and service documentation: confirm liability allocation, dispute procedures, and applicable payment protections.
- Independently sourced corporate contact records: confirm the legitimacy of any proposed onboarding or payment workflow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary website interaction. Clean external reputation, sustained historical continuity, professional corporate content, and stable technical behavior converge on legitimacy, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, and the observed addresses are CDN edge servers rather than identified origin candidates. This provides a meaningful reduction in direct origin exposure and is a mitigating infrastructure signal, but it is not proof of the operator's legitimacy.

Closing Assessment

Routine browsing is proportionate to the assessed posture; before credentials or payments are submitted, ordinary independent checks of merchant identity, contractual terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of celcoin.com.br.

- The request stayed on celcoin.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-26. NOTED
- The earliest public archive of this site is from 2014-12-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about celcoin.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
