Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the CEMAD website, presenting the Centro de Missões Assembleia de Deus in Governador Valadares as a local missionary and charitable association. Its pages describe mission projects, volunteer-supported activities, donations, photographs, location details, and contact channels, indicating a donation-funded nonprofit operating model.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence contains no phishing, impersonation, blacklist, or malicious-content indicators. The site's content is consistent across its homepage and organizational pages, and the observed behavior included no login form, hidden sensitive form, wallet connection, clipboard manipulation, or suspicious script activity. The published CNPJ, telephone contact, physical address, and operating hours provide concrete organizational context, although the operator's real-world identity remains independently unverified. The domain's historical presence and stable site behavior are consistent with an established website rather than a newly assembled impersonation page.

EVIDENCE

- Archive records show the domain first observed on 2002-08-05, with 82 snapshots spanning 2002–2023 across 22 years tracked.
- The homepage identifies CEMAD as the Centro de Missões Assembleia de Deus and presents mission projects, gallery content, location, and donation-related navigation.
- Behavioral inspection recorded 2 successful runs, 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 suspicious inline scripts.
- External reputation results recorded 0 abuse reports, 0 malicious detections, and no blacklist match in the supplied results.

Regulatory Verification Notes

The site presents itself as a charitable missionary association rather than a regulated financial service. Its homepage supplies the name “Associação Missionária Assembleia de Deus de Governador Valadares,” CNPJ 52.161.276/0001-55, an address, telephone number, email address, and opening hours. No regulated license or license number is claimed in the supplied pages; for a donation-based organization, this is a disclosure point to validate according to the intended donation arrangement, not evidence of deception. The available evidence supports an apparently legitimate organizational presentation, but it does not independently establish that the stated CNPJ or operator controls the domain. No matching broker-reputation record was identified.

EVIDENCE

- The site's footer displays CNPJ 52.161.276/0001-55 and the association name.
- The registration record names eNom, LLC as registrar.
- The site is served from AS47583, AS-HOSTINGER – Hostinger International Limited, CY.
- TLS uses issuer YE2 with DV validation and is valid through 2026-11-09T17:57:36+00:00.

What to Verify Next

Before making a material donation or submitting credentials, independently confirm that the stated association name and CNPJ correspond to the intended beneficiary through the relevant Brazilian registry or an independently sourced organizational contact. Confirm the donation recipient and payment-protection arrangements before authorizing funds, and validate official contact channels using information obtained outside the website. Any tax receipt, donation acknowledgement, or terms governing contributions should be checked for consistency with the beneficiary's independently confirmed identity.

EVIDENCE

- The homepage provides the stated CNPJ, physical location, telephone number, and operating hours for independent comparison.
- The site includes separate “Quem Somos,” “Projetos,” “Doação,” and “Contato” pages, allowing the organizational purpose and donation process to be reviewed separately.
- No sensitive form or login workflow was detected during the observed site interaction.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate charitable website. No scam or impersonation contradiction was identified, while independent confirmation of the real-world operator remains the principal qualification to the assessment.

Infrastructure Integrity

The website benefits from CDN/WAF protection, which is a mitigating control against direct exposure and common web abuse, although protective infrastructure is not proof of legitimacy. Observed edge servers include 216.198.79.1 and 64.29.17.1 on AS16509, while the identified hosting environment is AS47583 operated by Hostinger International Limited; several potential origin candidates were also observed.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent beneficiary, payment-protection, and credential-handling checks should be completed before material financial or account-related interaction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ceadad.org.

- The request stayed on ceadad.org. It was not redirected to another domain. CLEAR
- Registration is published under eNom, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-06. NOTED
- The earliest public archive of this site is from 2002-08-05. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cemad.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
