Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is Central Bank of India's retail-banking homepage, presenting deposit accounts, loans, cards, digital banking, pensioner services, welfare schemes, regulatory information, and branch-access tools for customers seeking conventional banking services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The site presents a coherent banking identity, external reputation checks found no malicious or suspicious detections, and the homepage showed no phishing, impersonation, deceptive-form, or wallet-abuse indicators.

EVIDENCE

- The domain was registered on 2005-02-17 and is approximately 21.47 years old.
- The homepage identifies Central Bank of India and links to About Us, Contact Us, careers, branch/ATM location, policies, and digital-banking pages.
- The homepage contained no reported red flags, hidden forms, suspicious scripts, or external password-submission destinations.

Regulatory Verification Notes

The site presents deposits, loans, cards, internet banking, UPI, pensioner services, government schemes, policies, and regulatory information consistent with a conventional commercial bank. The supplied content does not display a specific license or registration number, so authorization should be confirmed through the relevant official registry; this is a transparency and verification note, not evidence of impersonation. Registration through the National Internet Exchange of India and valid transport encryption provide additional identity and infrastructure context.

EVIDENCE

- The site is registered through National Internet Exchange of India, with NIXI recorded as the organization.
- Hosted on AS55470 (CYFUTURE-AS-IN — Cyfuture India Pvt. Ltd., IN).
- TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, DV validation, valid to 2026-10-18.
- The homepage links to regulatory-policy material, investor relations, RTI information, and pensioner services.

What to Verify Next

Confirm the institution's current authorization through the applicable financial-services registry and independently confirm official contact or branch details before initiating an unusually large or sensitive transaction.

EVIDENCE

- The Contact Us page provides an official service-contact route.
- The Branch/ATM/BC Locator supports independent branch-location confirmation.
- The Policies and regulatory-information pages provide the site's stated governance and service documentation.

Summary Verdict

The website merits a confident high-trust posture as a legitimate, established banking entity. Its identity, content, technical operation, and external reputation converge without observed contradiction, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The supplied infrastructure facts do not establish a confirmed CDN/WAF layer or separate origin-protection posture. This is a neutral technical observation and does not undermine the established legitimacy assessment.

Closing Assessment

Normal banking interaction is appropriate, with ordinary financial-service safeguards applied to higher-value transactions.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about centralbank.bank.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
