Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Central Bank of India banking portal presenting conventional retail and corporate financial services, customer support, digital banking, account services, lending, payments, and related financial products for customers and businesses.

Scam/Impersonation Risk

No contradictions were observed. The homepage consistently presents a conventional banking identity and includes detailed anti-fraud guidance, including authorized customer-call number ranges and warnings against sharing banking information with unverified callers. External reputation checks found no malicious or suspicious detections, no blacklist indication, and no reported abuse activity. The domain's long-established registration further supports continuity of identity.

- Homepage identifies Central Bank of India and publishes anti-fraud guidance concerning 1600- and 140-series calls.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist indication.
- Domain registered 2006 (~20.38 years old).

Regulatory Verification Notes

The site presents an established banking identity and provides account opening, loans, insurance, demat services, NPS, UPI, digital banking, and grievance support. No licence number or explicit regulator reference is stated in the supplied page content, so formal authorization remains a transparency item for independent confirmation rather than an indication of impersonation. The domain is registered through Sify Digital Services Limited, while its technical identity aligns with Central Bank of India infrastructure and an EV certificate issued to that organization.

- Homepage offers online account opening, demat accounts, NPS, loans, insurance, UPI, and customer-support services.
- Hosted on AS59194 (CBOI-AS - Central Bank of India, IN).
- TLS certificate issued by GeoTrust EV RSA CA G2 (EV), subject organization Central Bank of India, valid to 2026-10-20.

What to Verify Next

Confirm the institution's applicable authorization and current service status through an independently sourced official channel. For account or transaction matters, use the published grievance and customer-support routes

and validate important instructions through an offline bank channel before acting.

- Homepage provides Contact Us, Grievance, toll-free support, and cyber-crime helpline references.
- Homepage displays a scheduled-maintenance notice for UPI services, supporting confirmation of time-sensitive service availability.

Summary Verdict

The website presents as a legitimate, established, and trustworthy banking portal with a coherent identity, conventional financial-services model, clean external reputation, and strong technical identity signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Hosting resolves directly to two likely origin IP addresses on AS59194, operated by CBOI-AS - Central Bank of India, with no CDN or WAF identified. This direct institutional hosting posture provides useful attribution, while the absence of an intermediary edge layer simply means that CDN-based mitigation is not part of the observed architecture.

Closing Assessment

Prospective users may proceed with normal banking activity, while applying standard financial-service controls such as confirming material instructions through official support channels.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about centralbank.net.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
