Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the public-facing site of Centro Médico Pastore, a Rio de Janeiro medical clinic network presenting healthcare services, multiple physical units, patient support, and health information for prospective and existing patients.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or conflicting-identity indicators were observed. The site's healthcare presentation is coherent with its apparent clinic purpose, and external reputation checks returned no malicious or suspicious findings. Its sustained historical presence further supports an established identity rather than a recently created impersonation.

- The homepage identifies Centro Médico Pastore and presents consultations, examinations, patient services, and numerous clinic locations.
- The domain was registered in 2010 and is approximately 15.64 years old.
- The site has 288 archive snapshots spanning 2010–2026, covering 17 years.

Regulatory Verification Notes

The site presents a conventional healthcare business model involving paid medical consultations, diagnostic imaging, laboratory examinations, health assessments, and discount-club services. The available content does not state a licensing authority or license number; this is a transparency item for regulatory confirmation, not evidence of deception. The site's established page content, clean reputation, and valid transport security support its legitimacy assessment.

- The homepage describes medical consultations, imaging, laboratory examinations, health tests, patient scheduling, and multiple units.
- TLS is issued by GlobalSign Atlas R46 DV TLS CA 2026 Q2, uses DV validation, and is valid to 2026-10-25.
- The site has an established authority profile consistent with an operating public-facing healthcare organization.

What to Verify Next

Confirm the clinic's applicable registration and professional authorizations through the relevant Brazilian healthcare registries, and independently confirm appointment and patient-support channels before exchanging sensitive medical information.

- The homepage provides an “Área do paciente,” consultation and examination scheduling, telephone channels, and a locations directory.
- The site identifies multiple physical units across Rio de Janeiro and surrounding municipalities.

Summary Verdict

The website presents as a legitimate, established, and trustworthy healthcare service. The available evidence contains no contradictions or indicators of scam, phishing, or impersonation, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The site is protected by Incapsula CDN/WAF infrastructure, with observed traffic served through edge addresses rather than a directly exposed origin. This is a mitigating security control, although protective hosting alone does not establish legitimacy.

- Hosted on AS19551, Incapsula Inc, US.
- Observed edge IPs are 45.60.22.219 and 45.60.25.219.

Closing Assessment

Prospective patients may use the website for ordinary healthcare interactions, while regulated services and sensitive medical-data handling should remain subject to the organization’s normal institutional verification procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about centromedicopastore.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
