

Is certidaoonlinebrasil.com.br legit? TrustSniffer's high-trust assessment: 100/100

certidaoonlinebrasil.com.br

Verdict

100

OUT OF 100

HIGH TRUST

certidaoonlinebrasil.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

WHAT THIS SITE APPEARS TO BE

Portuguese-language homepage for a Brazilian private intermediary that locates, requests, processes, and delivers civil-registry and related documents. It explains the ordering and payment process, distinguishes itself from government authorities, lists service types and delivery windows, and provides a business registration number, location, email address, privacy policy, and contracting terms.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website operates as a Brazilian private intermediary for locating, requesting, processing, apostilling, and delivering civil-registry and related documents, including birth, marriage, death, property, protest, criminal-record, debt, and FGTS certificates. It presents a prepaid service model intended to simplify document retrieval across Brazil and delivery to the customer's chosen location.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud-related conflicts were observed. The homepage expressly distinguishes the business from government authorities, which materially reduces the risk that visitors could mistake it for an official registry. Its established provenance, consistent document-services identity, clean external reputation, and absence of deceptive browser behavior collectively support legitimacy.

- The homepage identifies the service as a private advisory and intermediation company rather than a government registry.
- The domain was registered in 2017 and is approximately 8.73 years old; registration records name BRWORKS PROJETOS LTDA as the owner.
- The web archive contains 57 snapshots spanning 2021–2026, representing 6 years of tracked history, with no detected suspicious repurposing or semantic conflict.
- External threat checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no harmful browsing classification, and no reported abuse against the assessed delivery address.

Regulatory Verification Notes

The site presents a business registration identifier, location, contact channel, privacy policy, contracting terms, service timeframes, and a clear description of its intermediary role. No professional license or regulatory authorization is claimed, and the supplied evidence does not establish that this document-retrieval business requires one; accordingly, the absence of a license claim is not a scam indicator. Payment before fulfillment is disclosed as part of the ordinary commercial process rather than concealed as an unexpected demand.

- The homepage explains the ordering, payment, processing, and delivery workflow and publishes expected pricing and fulfillment information.
- The legal notice describes the company's role as locating and obtaining documents for customers throughout Brazil.

- The privacy policy and contracting terms provide formal disclosures governing customer information and service engagement.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid until 2026-09-08.

What to Verify Next

For material or time-sensitive orders, the company name and published business registration identifier should be matched against the relevant Brazilian corporate registry. Customers should also confirm that the requested certificate type, delivery method, total fee, refund conditions, and expected completion date appear in the final order terms before payment. Where a document will be used for immigration, litigation, banking, or another formal purpose, the receiving institution should confirm the required format and whether apostilling or a full-content copy is necessary.

- The homepage offers both abbreviated and full-content versions of certain civil certificates, making format selection consequential.
- The services page includes Hague Apostille processing for documents intended for use abroad.
- The published workflow covers civil, property, protest, and compliance-related records whose acceptance requirements may differ by recipient.
- The contracting terms are the documented source for confirming fulfillment and payment conditions.

Summary Verdict

This is a legitimate, established, and trustworthy commercial website with a coherent identity, mature operating history, clean security reputation, and substantive customer-facing disclosures. No contradictory evidence undermines its stated purpose or business identity. Normal interaction, including account login, order placement, and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare's mainstream CDN/WAF infrastructure. All four observed addresses were Cloudflare edge systems, so the origin server was not exposed during the assessment; this reduces direct infrastructure exposure but is treated as a security mitigation rather than independent proof of business legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- DNS observations resolved to four Cloudflare edge addresses and identified no origin-server candidate.

Closing Assessment

Prospective customers may use the service normally, applying ordinary transaction diligence by retaining the order confirmation, contractual terms, payment record, and delivery correspondence until the requested documents have been accepted.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of certidaoonlinebrasil.com.br.

- The request stayed on certidaoonlinebrasil.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-09. NOTED
- The earliest public archive of this site is from 2021-06-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about certidaoonlinebrasil.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
