## Full analysis

### Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an official-looking regional school site for Centro Educacional Tiradentes, presenting institutional information, educational values, facilities, contact details, social-media links, and invitations to schedule visits or participate in admissions for a local private-school business model.

### Scam/Impersonation Risk

The site presents a coherent educational purpose and the homepage analysis found no login form, credential-harvesting mechanism, financial-investment scheme, or suspected brand impersonation. However, those benign page characteristics are contradicted by confirmed external blacklist status and multiple malicious detections, including coverage from two security vendors; this is a material security concern for sensitive interaction. The available evidence does not establish that the school itself is impersonating another entity, but the domain should be treated as unsuitable for login, credential submission, payment, or other sensitive activity unless independently cleared.

#### EVIDENCE

- The homepage describes a school in Volta Redonda, its mission and facilities, and prompts visitors to schedule a visit or review admissions information; no sensitive form or login flow was detected.
- External scanning recorded 12 malicious and 2 suspicious detections, with a Tier-1 threat signal present.
- The domain was identified on external blacklist sources; a separate major browsing-safety check reported no malicious result.
- Registration records show creation on 2003-06-18 and an age of 23.19 years; archival records span 2005-11-24 through 2026-06-12, covering 22 years.

#### Regulatory Verification Notes

The legal and identity presentation is consistent with a local private educational institution, and the available identity linkage is likely rather than independently verified. The site does not claim a specific license or provide a license number in the supplied content, while the disclosure state is unclear; this is a regulatory-transparency gap requiring confirmation with the relevant Brazilian education authority, not by itself evidence of a scam. The external broker-reputation dataset produced no matching record, which provides no affirmative regulatory assurance.

#### EVIDENCE

- The about and institutional-content areas describe school operations, educational objectives, admissions, and arrangements to schedule visits.
- No licensing authority or license number is claimed in the supplied business-model and page disclosures.
- The site's hosting resolves through AS47583, AS-HOSTINGER — Hostinger International Limited, CY, with the infrastructure registered through RIPE NCC and located in Germany.
- The site's TLS certificate is DV-validated, issued by YE2, and valid until 2026-09-26T02:23:23+00:00.

#### What to Verify Next

Before any sensitive interaction, an independent party should confirm that the institution named on the site is currently operating at the published physical location and that the domain is an officially authorized communication channel. The relevant education registry should be checked for the institution's authorization, and contact details should be validated through an independently sourced offline route rather than relying solely on the website or its linked social accounts. Any account, payment, or enrollment workflow should remain suspended until the blacklist findings are resolved and the domain's security status is reassessed.

## EVIDENCE

- The homepage provides the institution's local address, contact channels, social links, and visit-scheduling prompts as the available verification points.
- The site links to Facebook, Instagram, and WhatsApp accounts, creating independent channels that can be checked against externally sourced institutional records.
- The supplied interaction analysis recorded two successful browser runs with no hidden forms, wallet activity, clipboard manipulation, or suspicious inline scripts.

## Summary Verdict

The overall posture is **critical trust risk**. The site's institutional presentation is internally coherent, but the confirmed external threat and blacklist indicators dominate the assessment and prevent the website from being treated as trustworthy for sensitive interactions.

## Infrastructure Integrity

The site is served directly through Hostinger infrastructure rather than a detected CDN edge, with likely origin addresses exposed in the resolved hosting configuration. Its valid domain-validated TLS certificate protects transport confidentiality, but encryption and ordinary hosting infrastructure do not establish legitimacy or offset the external reputation findings.

## Closing Assessment

The appropriate interim posture is read-only informational access only; credentials, login activity, payments, and enrollment transactions should require independent confirmation through trusted institutional channels and a cleared security assessment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

### 01 Governance Risk

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about cetiradentes.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
