

Is chaserecovery.net a scam? TrustSniffer's high-risk assessment: 0/100

chaserecovery.net

Verdict

0

OUT OF 100

CRITICAL RISK

chaserecovery.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Site for 'Chase Recovery' offering addiction treatment information and a phone hotline to connect users with rehab/detox centers. Content describes programs (inpatient, outpatient, sober living, therapy) and encourages calling the provided number.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

 Who Answers?

What chaserecovery.net served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Chase Recovery is a healthcare and addiction-treatment information site that presents inpatient, outpatient, sober-living, therapy, and detox-related options while directing visitors to a telephone hotline intended to connect them with treatment providers, apparently through a referral or lead-generation model.

Scam/Impersonation Risk

The site's visible content is consistent with an addiction-treatment referral service and does not itself show a login page, payment solicitation, phishing form, or clear brand-impersonation mechanism. However, this benign presentation is outweighed by a confirmed blacklist status and malicious detections from external security systems, including Fortinet and Sophos. The combination is a material trust contradiction for a service handling people seeking healthcare assistance. The site's contact-channel integrity also contains an anomaly: no reliable conclusion can be drawn from that artifact alone, but it warrants independent confirmation of the organization's contact routes before engagement.

EVIDENCE

- The homepage presents addiction-treatment information and a hotline connecting callers with rehabilitation or detox providers.
- External reputation telemetry records 10 malicious detections, with Fortinet and Sophos identified among the flagging vendors.
- The domain was registered in 2017 and is approximately 8.83 years old.
- Historical records show coverage from 2018-03-09T03:40:49Z through 2025-11-13T11:42:51Z, spanning 8 years.

Regulatory Verification Notes

The site describes treatment-related services but does not state a licensing authority or provide a license number in the reviewed content. That is a regulatory-transparency gap rather than independent proof of fraud; nevertheless, the operator's real-world identity remains unverified, so the site's treatment-provider and referral claims should not be treated as independently established. The disclosed business model also appears to involve referring prospective patients to third-party rehabilitation or detoxification providers, making the identity of the operator, the relationship with referred providers, and the handling of health-related inquiries important verification matters. Transport security and mainstream hosting are positive technical conditions, but they do not resolve the external threat findings.

EVIDENCE

- The homepage and navigation identify "Chase Recovery" and describe inpatient treatment, intensive outpatient treatment, sober living, family therapy, and cognitive behavioral therapy.
- The reviewed business content contains no stated licensing authority or license number.
- Hosting telemetry identifies AS16509, AMAZON-02 — Amazon.com, Inc., US.
- The site uses a valid DV TLS certificate issued by YE2, valid to 2026-10-31T23:01:32+00:00.

What to Verify Next

Before any sensitive engagement, an independent healthcare or business registry should be used to confirm the operator and, where applicable, the licensing status of the treatment providers to which callers are referred. Provider affiliations, privacy practices, consent handling, and any fees or referral relationships should be confirmed through independently sourced contact details rather than relying solely on the site. Credential submission, account creation, payment, or disclosure of sensitive health information should not occur unless those checks produce a satisfactory independent basis for trust.

EVIDENCE

- The homepage contains no login form or sensitive-data submission form.
- Behavioral testing recorded no hidden forms, no password-external forms, and no external POST activity.
- The site's stated purpose is to connect callers with rehabilitation or detoxification centers, creating a need to validate the referred providers independently.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for treating this website as a trusted channel for credentials, payments, account access, or other high-consequence interaction. The site's healthcare-oriented presentation does not overcome the confirmed external reputation contradiction, and its operator identity is not independently verified.

Infrastructure Integrity

The site is delivered through AWS CDN/WAF infrastructure, with observed edge delivery associated with AS16509; the origin was not identified in the analysis. This provides a useful layer of network protection and can mitigate direct exposure of the origin, but it is an infrastructure control rather than evidence that the operator or content is legitimate.

EVIDENCE

- The observed edge IP was 44.231.93.145.
- The hosting organization is AMAZON-02 — Amazon.com, Inc., US, operating in the US.
- AWS CDN/WAF protection was detected, with one observed edge IP and no origin candidate identified.

Closing Assessment

The proportionate course is to suspend sensitive interaction and independently validate the operator, provider relationships, and applicable healthcare credentials through trusted offline or registry-based channels before any referral, disclosure, or transaction proceeds.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chaserecovery.net.

- The request stayed on chaserecovery.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-42.org, across 4 name servers. NOTED
- The registration is paid up to 2026-10-25. NOTED
- The earliest public archive of this site is from 2018-03-09. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chaserecovery.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with

a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
