

Is chatgpt.com legit? TrustSniffer's high-trust assessment: 90/100

chatgpt.com

Verdict

90

OUT OF 100

HIGH TRUST

chatgpt.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 60%.

What this site appears to be

A login/sign-up landing page for an AI chat service (ChatGPT) with buttons to log in, sign up, and references to plans and pricing; minimal descriptive content beyond account prompts.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://chatgpt.com/>

What chatgpt.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This is the ChatGPT web service, presenting an AI chat interface with account sign-in and registration, access to saved chats and image/file features, and optional paid plans; its apparent business model is subscription-supported access to an online AI product.

Scam/Impersonation Risk

No contradictions were observed: there are no detected phishing, impersonation, or conflicting legal-identity signals. The homepage's limited explanatory context and login-focused presentation leave the real-world operator identity independently unverified, but this is an identity-assurance limitation rather than evidence of a scam. The site's established domain continuity, extensive historical presence, strong global traffic footprint, and clean available reputation signals materially support an apparently legitimate service.

EVIDENCE

- Domain registration: 2022-11-30; approximately 3.72 years old.
- Web archive: 5,000 snapshots spanning 2022–2026, with 5 years tracked.
- The homepage is classified as “login-only / unknown” and contains one login form with limited contextual content.
- Established global traffic footprint: rank 191.

Regulatory Verification Notes

The site provides Terms and Privacy Policy links, but the captured landing page presents limited corporate, merchant, or licensing information. For an AI subscription service, any applicable authorization should be assessed according to the relevant jurisdiction and activity; the absence of a visible license number is a transparency item for verification, not a scam indicator. A small number of abuse reports were associated with shared CDN infrastructure; the address was whitelisted, confidence was zero, and the attribution was explicitly to shared provider infrastructure rather than this site. No broker-dataset match was identified, although that is contextual reputation information rather than a legal or regulatory determination.

EVIDENCE

- The homepage links to Terms, Privacy Policy, and cookie-policy information.
- Registrar: MarkMonitor, Inc.; registrant organization recorded as OpenAI.
- Shared-infrastructure reputation signal: 6 abuse reports associated with the CDN address, marked whitelisted with confidence score 0.
- No matching broker record was returned.

What to Verify Next

Before credential or payment interactions, independently confirm the applicable operating or billing entity through an authoritative corporate or merchant source, review the service terms and cancellation or refund provisions, and confirm that the selected payment method provides appropriate dispute protection. Any jurisdiction-specific authorization relevant to the service should be checked directly with the competent registry.

EVIDENCE

- The homepage directs account holders to Terms and Privacy Policy documents that can be reviewed before registration.
- The page presents account access and paid-plan pathways, making independent billing-entity and payment-protection checks relevant.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The site should not be treated as independently proving the real-world identity of its operator, so legitimacy is assessed as apparent and evidence-consistent rather than conclusively established.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN and WAF, and the observed addresses were CDN edge servers rather than an exposed origin. This provides a meaningful layer of traffic filtering and origin shielding, but remains a mitigating infrastructure control rather than proof of legitimacy.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET—Cloudflare, Inc., US).
- Observed edge IPs: 172.64.155.209 and 104.18.32.47; the origin server IP was not observable.
- TLS certificate issued by WE1, domain-validated (DV), valid to 2026-10-21.

Closing Assessment

Ordinary service use is proportionate to the available risk assessment, subject to completing the independent merchant-identity, terms/refund, and payment-protection checks before submitting credentials or payment details.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 6 reports on hosting IP 2a06:98c1:3101::6812:202f (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chatgpt.com.

- The request stayed on chatgpt.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-30. NOTED
- The earliest public archive of this site is from 2022-12-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chatgpt.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
