

Is chelinvest.ru legit? TrustSniffer's high-trust assessment: 90/100

chelinvest.ru

Verdict

90

OUT OF 100

HIGH TRUST

chelinvest.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

An access-denied / suspicious-activity notice showing an IP address, timestamp, error ID, and support phone number (Russian +7). Advises contacting support and notes limited availability when using anonymization/VPN/TOR.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an operational access-control page that presents a multilingual “access denied” warning, reports suspicious activity associated with the connecting address, provides an information-support telephone number, and directs the visitor to supply the service name and displayed error details when contacting support. Its apparent purpose is to manage access to an internet service or infrastructure environment rather than to market products, solicit funds, or collect credentials.

Scam/Impersonation Risk

No contradictions were observed. The captured page contains no login form, payment request, wallet connection, financial solicitation, or apparent brand-impersonation content; its function is informational and operational. The domain also presents a long-established and historically continuous presence, while external reputation checks found no malicious or suspicious detections and no confirmed phishing or blacklist result. The site is therefore consistent with an established, apparently legitimate service, although the real-world operator identity remains independently unverified. Behavioral collection recorded dynamic page changes and non-whitelisted network activity, but these observations were not accompanied by sensitive forms, wallet activity, credential exfiltration, or a page-level fraud indicator.

EVIDENCE

- Domain registration: 2001-03-20T21:00:00Z; age 25.41 years.
- Web archive: 729 snapshots from 2001-09-28T03:31:27Z through 2026-07-25T12:00:26Z, covering 26 years with a maximum gap of 2 years.
- External reputation evaluation: `vt\_malicious=0`, `vt\_suspicious=0`, `gsb\_malicious=false`, and `external\_blacklist=false`.
- The captured homepage is classified as an access-denied page, with no login form, hidden form, sensitive form, wallet activity, or page-level red flags.

Regulatory Verification Notes

The available page is an operational warning rather than a legal, corporate, or financial-services disclosure page. It does not establish the operator’s legal identity, licensing position, or regulatory status, and no license claim or registration number is presented in the supplied content; this is a verification gap, not evidence of a scam. The domain is registered through RU-CENTER-RU, and its transport certificate provides organization-validated authentication associated with PAO CHELYABINVESTBANK. These infrastructure and certificate

signals are consistent with an established site, but they do not independently prove that the website operator is the named organization. No match was returned in the supplied broker-reputation context.

EVIDENCE

- Registrar: RU-CENTER-RU; registration expires 2027-03-22T21:00:00Z.
- TLS certificate: GlobalSign RSA OV SSL CA 2018, organization validation (OV), subject organization PAO CHELYABINVESTBANK, valid until 2027-03-02T17:13:04+00:00.
- The captured homepage has no license authority, license number, corporate disclosure, or regulated-entity claim.
- The supplied broker-reputation lookup returned `matched=false`.

What to Verify Next

Before credential or payment interactions, an independent confirmation should connect the domain to the intended real-world organization, using an official registry or an independently sourced institutional contact route rather than relying solely on the captured page. If the service is expected to provide regulated financial activity, its authorization should be checked with the relevant regulator, and any applicable terms, dispute process, and payment-protection arrangements should be reviewed. Official support channels should also be confirmed through an independent route before sharing the displayed access details.

EVIDENCE

- The captured homepage provides operational support instructions but no independently verified legal-entity or licensing information.
- The page contains no account, password, payment, or wallet form.
- The site's stated function is access control and service support, so the appropriate verification focus is operator attribution and the purpose of any subsequent account or payment flow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No confirmed scam, phishing, impersonation, or identity-conflict signal was observed, but the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single origin address and no CDN or WAF provider was identified. Its hosting infrastructure is associated with PJSC _CHELYABINVESTBANK_, RU, which provides a coherent technical hosting context; direct origin hosting offers less edge-layer shielding than a site delivered through a mainstream CDN, but this is an architectural consideration rather than evidence of maliciousness.

EVIDENCE

- Hosting: AS34291, CINVB-AS - PJSC _CHELYABINVESTBANK_, RU; registry RIPE NCC; country RU.
- Resolved infrastructure: 1 unique IP, 0 edge IPs, and 1 likely origin IP; `has\_cdn=false`.

Closing Assessment

Normal browsing and ordinary service use are proportionate to the current evidence, subject to the standard independent identity, authorization, terms, and payment-protection checks before any sensitive transaction or credential submission.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chelinvest.ru.

- The request stayed on chelinvest.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by 39.109, across 3 name servers. NOTED
- The registration is paid up to 2027-03-22. NOTED
- The earliest public archive of this site is from 2001-09-28. CLEAR
- It is hosted on CINVБ-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chelinvest.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
