Full analysis

Overview

CHEZIAN Y ASOCIADOS is a corporate website presenting an Argentina-based human-resources services business focused on recruitment and selection, payroll administration, personnel administration, social-security and tax advisory, retirement procedures, and online training for companies. Its apparent business model is based on paid B2B professional services, payroll-related work, and training engagements.

Scam/Impersonation Risk

No contradictions were observed. The site's business presentation is coherent with a conventional HR consultancy: the homepage and services content describe recruitment, payroll, personnel records, advisory work, and training rather than financial solicitation, cryptocurrency activity, or other commonly abused transaction models. The site has no login form, no sensitive-data form, no wallet connection, no detected brand impersonation, and no identified phishing or malicious-content indicators. Contact information, telephone and WhatsApp availability, and physical locations in Argentina provide a substantive contact framework, although the real-world operator remains only apparently connected to the website rather than independently verified.

Evidence:

- The homepage identifies CHEZIAN Y ASOCIADOS and states a mission to provide integrated human-resources solutions to companies.
- The services page describes recruitment and selection, payroll liquidation, personnel administration, tax and social-security advisory, retirement procedures, and online training.
- The contact page presents email channels, telephone/WhatsApp hours, and physical locations in Argentina; the site contains one contact form and no login or password form.
- External reputation checks recorded zero malicious detections, zero suspicious detections, zero abuse reports, and no matched broker-reputation profile.

Regulatory Verification Notes

The website provides a clear description of its commercial services and presents values, mission, and organisational information through its corporate pages. It does not state a license authority or registration number, and the available disclosure state is therefore insufficient to independently establish whether any regulated professional activity, payroll processing, tax advisory, or employment-related service requires a particular authorization. This is a verification gap rather than evidence of impersonation or fraud. The absence of a matched third-party broker profile is a limited reputational signal, not a legal or licensing determination.

Evidence:

- The “Nosotros,” “Nuestros Valores,” and “Misión” pages describe an interdisciplinary team, professional experience, and the stated service purpose.
- The services page presents payroll, personnel administration, tax, social-security, and retirement-related offerings without identifying a licensing authority or license number.
- The domain was registered through 1API GmbH on 2019-03-18 and has an age of 7.43 years, with expiration recorded as 2027-03-18.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-11-16.

What to Verify Next

Before a commercial engagement, the prospective customer should confirm the contracting entity, responsible professionals, scope of authority, and applicable Argentine licensing or registration requirements through the relevant official registry. Contract terms should identify deliverables, handling of employee records, confidentiality obligations, liability allocation, and payment protections. Contact details should also be confirmed through an independent route, and any payroll or tax mandate should be validated against the client's own professional and compliance requirements. Evidence:

- The corporate pages identify the service categories but do not provide a licensing authority or registration number.
- The contact page supplies telephone/WhatsApp and physical-location information suitable for independent confirmation.
- The site links to an Instagram presence, providing an additional channel for checking continuity of the claimed business identity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture for its stated HR-services purpose. The classification is strong, but the operator's real-world identity is not independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves directly to 167.250.5.32 in Argentina and is hosted on AS264649, NUT HOST SRL, under the LACNIC registry. No CDN or WAF was detected, so the infrastructure does not provide an additional edge-protection layer; nevertheless, the confirmed hosting attribution and valid TLS deployment are consistent with a normally operating business website.

Closing Assessment

Standard browsing and ordinary business enquiries are proportionate to the assessed posture; before submitting credentials or making payments, normal independent checks of merchant identity, contractual terms, return or cancellation provisions where applicable, and payment protection should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chezianyasociados.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
