Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Spanish-language lifestyle and entertainment magazine presenting fashion, celebrity, beauty, wellness, travel, food, society, and regional Mexican coverage, supported by advertising, digital-magazine readership, newsletter subscriptions, and audience accounts.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive financial propositions were observed. The site's editorial purpose is consistent across its content and functionality, while tested interactions showed no cloaking, hidden forms, suspicious scripts, external form submissions, wallet access, or clipboard manipulation. Its long-established registration and clean external reputation provide strong, convergent evidence that this is the legitimate magazine site rather than an imitation or transient abuse operation.

- Domain-registration records show AGENCIA DIGITAL SA DE CV as the owner and Gandi SAS as registrar; registered 29 September 2006 (~19.86 years old).
- The homepage displayed substantive, internally consistent magazine content across eight editorial topic areas, with no detected red flags.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no harmful-site finding, no reported abuse, and no signature matches.
- The domain held a global traffic rank of 214,181 and was within the top one million websites.

Regulatory Verification Notes

The site operates as a general-interest editorial publication rather than a financial, brokerage, investment, or deposit-taking service, so the absence of a financial-services licence claim is consistent with its stated business model. Standard legal and privacy links are presented, although the supplied homepage evidence does not establish the full scope of their corporate disclosures. No adverse broker-reputation match was found; this is contextual reputation evidence rather than a regulatory determination.

- The homepage presented registration, login, newsletter, digital-edition, advertising, legal, and privacy pathways appropriate to a commercial publication.
- The sole detected homepage form was an email-newsletter subscription with no sensitive fields or untrusted submission destination.
- The site's transport encryption used a DV certificate issued by Amazon RSA 2048 M02, valid until 7 October 2026.
- The hosting environment served the site from AS16509, operated by AMAZON-02 — Amazon.com, Inc., US.

What to Verify Next

For institutional onboarding, the appropriate due-diligence steps are to match the legal-page publisher details against the recorded corporate owner, confirm that advertising or commercial correspondence uses independently established official channels, and review the privacy notice and account terms for data handling, retention, and user-rights provisions.

- The homepage linked to Facebook, X, Instagram, and Threads profiles, providing channels that can support independent brand-contact corroboration.
- Account registration and sign-in were offered as standard navigation features, but no login form was embedded in the assessed homepage.
- The site displayed a cookie-consent notice, making the underlying privacy and cookie terms relevant to an institutional data-governance review.

Summary Verdict

The website is legitimate, established, and trustworthy, with a coherent editorial identity and strong convergence among registration, reputation, content, and behavioral evidence. No contradictory or materially suspicious signals were identified, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The site is protected by AWS CloudFront, with all four observed addresses operating as Amazon edge servers. The origin server was not exposed during the assessment, which is normal for this architecture and reduces direct infrastructure exposure; this protection mitigates technical attack surface but is not, by itself, proof of legitimacy.

Closing Assessment

Prospective users and institutional teams may engage with the site normally, applying routine privacy, account-security, and vendor-onboarding controls appropriate to a commercial digital publication.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chicmagazine.com.mx.

- The request stayed on chicmagazine.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2026-09-28. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chicmagazine.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
