Full analysis

Overview

The website is a Portuguese-language ecommerce storefront for Chopp Brahma products, packaged beverages, party supplies, and event-related services, enabling customers to arrange delivery or collection and, for eligible orders, temporary use and installation of draft-beer equipment.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The site's established provenance, consistent beverage-oriented domain identity, and clean external threat-reputation results support the conclusion that it is a legitimate commercial website rather than an imitation or opportunistic storefront. Historical records are too limited in content to prove uninterrupted business continuity, but they show no suspicious repurposing or semantic conflict.

- The domain registration record shows registration on 17 June 2005, making the domain approximately 21.15 years old.
- The web archive records 223 snapshots from 6 February 2008 through 19 May 2026, spanning 19 tracked years; the sampled history shows no detected semantic drift or suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no harmful-site finding, no external blacklist finding, and no reported abuse against the observed infrastructure.
- The homepage exhibited no hidden forms, externally submitted password forms, wallet-draining behavior, clipboard hijacking, or cloaking.

Regulatory Verification Notes

The site presents ordinary beverage-commerce disclosures rather than investment, brokerage, or financial-service claims. It provides terms of use, a privacy policy, payment information, FAQs, institutional and support pathways, cookie controls, and a responsible-drinking notice restricting sales to adults. No license or corporate-registration number was identified in the supplied page content; for this business model, that is a disclosure-verification point rather than evidence of fraud. The Ambev-associated page content, Ambev-domain contact channel, and organization-validated certificate issued to Anheuser-Busch InBev SA provide convergent institutional identity evidence.

- The homepage links to Terms of Use, Privacy Policy, payment information, FAQs, institutional information, and customer-support resources.
- The homepage states that alcohol is prohibited for persons under 18 and includes a responsible-consumption notice.

- The site's transport encryption uses an organization-validated certificate issued by Sectigo Public Server Authentication CA OV R36 to Anheuser-Busch InBev SA, valid through 14 November 2026.
- The reviewed page content contains no claim of a regulated financial license, named licensing authority, or license number.

What to Verify Next

Routine transaction due diligence should confirm the applicable regional seller, final price, payment descriptor, cancellation terms, delivery or pickup conditions, and responsibility for loaned equipment before checkout. Customers arranging events should also confirm scheduling, installation, deposit, return, and availability conditions through the official channels presented by the site.

- The ordering instructions require a postal code to determine regional price and availability.
- The homepage requests that draft-beer orders be scheduled at least three days in advance.
- The stated fulfillment model includes delivery and installation or collection from a nearby store, with the dispenser and barrel provided temporarily while the customer pays for the draft beer.

Summary Verdict

The website presents as a legitimate, established, and trustworthy ecommerce operation. Its identity, long-running provenance, institutional indicators, and clean threat reputation converge without material contradiction, making normal account access and standard transactions appropriate.

Infrastructure Integrity

The site is protected by the Incapsula CDN/WAF, and both observed addresses were edge systems rather than exposed origin infrastructure. This reduces direct origin exposure and provides a conventional defensive layer, although infrastructure protection is supporting evidence rather than independent proof of legitimacy.

- The site is served from AS19551, operated by INCAPSULA – Incapsula Inc, US.
- Two CDN edge addresses were observed, both on AS19551; no origin-server candidate was exposed during the analysis.

Closing Assessment

Prospective customers may use the site normally, including account login and standard purchases, while applying customary ecommerce checks to order details and payment confirmation.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about choppbrahmaexpress.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
