Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ChoufTV is an established Moroccan digital news and online television portal presenting current-affairs reporting, video programming, sports, opinion, lifestyle and cooking content, polls, newsletters, and a digital-newspaper archive, with an apparent advertising- and audience-engagement-based business model.

Scam/Impersonation Risk

No phishing, impersonation, blacklisting, or conflicting legal-identity signals were observed. The site's extensive historical footprint, continuing publication activity, and consistent news-media presentation support its identity as a longstanding content publisher rather than a recently created deceptive operation. Its interactive elements show no credential-harvesting, wallet, payment, or investment mechanics.

- The domain record shows registration in 2015 (~11.5 years old), with creation on 20 January 2015 and expiry on 20 January 2027.
- The historical record contains 5,000 archive snapshots spanning 2013–2022 (10 years tracked), with no suspicious repurposing or semantic drift identified.
- The homepage showed no login form, hidden form, brand-impersonation indicator, or suspicious inline script.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse associated with the observed delivery infrastructure.

Regulatory Verification Notes

ChoufTV presents a news and online-television service rather than a financial, investment, deposit-taking, or brokerage proposition; no regulated financial activity is evident from the supplied pages. Consequently, the absence of a financial-services licence claim is consistent with the apparent business model and is not a scam indicator. The available page analysis does not establish the completeness of the publisher's corporate or editorial disclosures, but the domain registration identifies a named registrant and an established registrar.

- The domain registration names Moussa El Hajraoui as registrant and ADK MEDIA as registrar.
- The homepage describes ChoufTV as Morocco's first electronic television service and presents organizational links, advertising contact information, and a newspaper archive.
- The homepage's business flows are editorial consumption, advertising, polling, and newsletter engagement; no investment or deposit-based value flow was detected.
- No matching broker profile or third-party regulatory claim was identified in the supplied reputational context.

What to Verify Next

For enterprise onboarding, advertising procurement, syndication, or other contractual engagement, the counterparty’s legal name, authority to contract, billing details, and editorial contact channels should be confirmed through formal documentation. Any material reliance on published reporting should follow the institution’s normal source-validation and media-due-diligence procedures.

- The supplied homepage analysis confirms organizational and advertising pathways but does not provide the underlying contractual documentation needed for counterparty onboarding.
- The observed forms are limited to a poll and newsletter subscription; neither was classified as sensitive or directed to an untrusted destination.
- The homepage contains a substantial editorial corpus across Moroccan public affairs, international news, migration, weather, sports, entertainment, and lifestyle topics.

Summary Verdict

The website is a legitimate, established, and trustworthy news-media operation. Its identity, historical continuity, clean external reputation, substantive editorial presence, and benign interaction model converge without material contradiction; normal browsing, account login where offered, and standard use are appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s mainstream CDN/WAF, and all observed addresses were edge nodes rather than exposed origin infrastructure. This reduces direct origin exposure and provides a meaningful security mitigation, although infrastructure protection alone is not proof of organizational legitimacy. The site also uses a valid domain-validated TLS certificate.

- The hosting infrastructure is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Six observed addresses were classified as Cloudflare edge addresses; no origin-server candidate was exposed.
- The site’s TLS certificate was issued by WE1 with DV validation and is valid until 18 October 2026.

Closing Assessment

Prospective users may interact with the site normally, while organizations entering commercial relationships should apply their standard counterparty and contracting controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chouftv.ma.

- The request for chouftv.ma ended on chouftv.net, a different domain. WATCH
- Registration is published under ADK MEDIA. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-20. NOTED
- The earliest public archive of this site is from 2013-05-26. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chouftv.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
