

Is chula.ac.th safe? TrustSniffer's moderate-trust assessment: 65/100

chula.ac.th

Verdict

65
OUT OF 100

MODERATE TRUST

chula.ac.th is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 45%.

What this site appears to be

Official Chulalongkorn University website (Thai). Provides extensive informational pages on about, education programs, research, student life, services, news, events and donation options. Contact address and emails listed.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This Thai-language website presents itself as the official Chulalongkorn University portal, offering information on the university's history, governance, academic programs, admissions, research, student services, news, events, and donation activities. Its apparent purpose is institutional communication and education rather than commercial trading or financial services.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no phishing, impersonation, blacklist, or malicious-content indicators. The homepage has the structure and content of an institutional university portal, including extensive sections for programs, research, administration, student services, public complaints, and donations. The site does not present a login form, cryptocurrency functionality, wallet connection, or other high-risk interaction pattern. Its external reputation signals are clean, and its global traffic footprint is established, which supports—but does not independently prove—the site's institutional identity.

EVIDENCE

- The homepage is titled “จุฬาลงกรณ์มหาวิทยาลัย - จุฬาลงกรณ์มหาวิทยาลัย” and contains extensive university-specific navigation covering education, research, administration, student life, and public services.
- The homepage contains one search/donation form and no sensitive form, hidden form, or login form.
- External checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit; the site's traffic rank was 16735.

Regulatory Verification Notes

The site's academic-domain presentation and detailed institutional content are consistent with a university website, but the real-world operator has not been independently verified by the available evidence. The site includes organizational structure, executive information, public-disclosure material, program accreditation references, complaint channels, and contact facilities, providing meaningful on-page substance. The available regulatory context does not establish a financial-services authorization, although the site's stated model is education, research, student services, and fundraising rather than regulated investment activity. Before a donation or other sensitive transaction, the relevant institutional and payment details should therefore be confirmed independently.

EVIDENCE

- The university information pages include sections for executive management, organizational structure, university council information, and public disclosure.
- The site uses the academic suffix “ac.th”; the registrar identified for the domain is THNIC.
- The site is served from AS19551, identified as INCAPSULA - Incapsula Inc, US.
- The transport certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2027-02-05 23:59:59 UTC.

What to Verify Next

For any donation or other consequential interaction, confirm the institution’s official payment instructions and recipient details through an independently sourced university contact route rather than relying solely on a newly encountered page. Confirm that any payment destination, donation campaign, or third-party service is consistent with the university’s published administrative channels. For institutional engagement, compare the relevant program or department details with independently obtained university contact information.

EVIDENCE

- The contact facilities include a listed address and email contacts for the university.
- The site provides a dedicated electronic donation system and named fundraising initiatives.
- The university pages include public complaint channels covering corruption and misconduct.

Summary Verdict

The overall posture is **moderate trust**. Available evidence is consistent with an established, apparently legitimate academic website and contains no observed scam or impersonation contradiction; however, independent operator verification remains incomplete, so the site should not be treated as fully authenticated for high-consequence activity.

Infrastructure Integrity

The site is served through Incapsula infrastructure, which provides a protective intermediary layer and reduces direct exposure of the underlying service. This is a mitigating technical characteristic only and is not, by itself, evidence of institutional legitimacy.

Closing Assessment

Ordinary informational use is proportionate; before donations, credential submission, or other sensitive actions, the official channel and transaction details should be confirmed through an independent route.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of chula.ac.th.

- The request stayed on chula.ac.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by ac.th, across 3 name servers. NOTED
- It is hosted on INCAPSULA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about chula.ac.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
