What churrascariameinhaus.com.br served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is the online presence of Churrascaria Mein Haus, a Brazilian churrascaria in Florianópolis presenting its menu, rodízio/espeto-corrido dining service, event space, testimonials, opening information, reservations, contact details, and links to social platforms, with the apparent purpose of attracting restaurant customers and event bookings.

Scam/Impersonation Risk

The site's visible content is consistent with a local restaurant and does not show an identity inconsistency or page-level brand impersonation indicator. However, this benign presentation is outweighed by strong external security contradictions: the domain was reported as malicious by multiple security detections, received an additional suspicious classification, and is associated with a confirmed blacklist result. The available evidence therefore supports a **critical risk posture for sensitive interaction**, even though the website itself contains no login form, cryptocurrency functionality, wallet connection, or other obvious phishing mechanism. The apparent

connection to the real-world restaurant is only likely rather than independently verified, so the legitimate-looking content cannot neutralize the external threat evidence.

EVIDENCE

- The homepage identifies “Churrascaria Mein Haus” and describes a restaurant founded in 2002, offering rodízio dining and private events.
- Registration records show the domain was created on 2006-03-04 and is approximately 20.47 years old; the listed registrant is Churrascaria Mein Haus Ltda - Me.
- Historical archive coverage records the restaurant category from 2008 through 2026, spanning 19 years tracked, with no detected change in core business category.
- External security telemetry recorded 11 malicious and 1 suspicious detection, with blacklist status confirmed.

Regulatory Verification Notes

The reviewed pages describe ordinary hospitality services rather than a regulated financial or investment offering. They provide business, contact, reservation, menu, and event information, but no regulatory license, registration number, or licensing authority is presented; for this type of business, that is a disclosure and identity-verification gap rather than standalone evidence of fraud. The site’s apparent identity is supported by its consistent restaurant content and historical continuity, but the operator’s real-world identity is not independently verified. The strong external security warnings remain the controlling concern for engagement decisions.

EVIDENCE

- The homepage and business-information pages present restaurant services, opening information, testimonials, and event-booking content without a stated license number or regulatory authority.
- The site is served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-11-17.

What to Verify Next

Before any sensitive interaction, an independent offline route should confirm that the domain and reservation details are officially operated by the Florianópolis restaurant, rather than relying solely on the website’s own claims. Any payment recipient, reservation deposit, or account request should be checked against independently obtained business details, and official social or directory profiles should be used only to corroborate—not replace—that confirmation.

EVIDENCE

- The contact and reservations pages expose a contact/registration form but no password or other sensitive form.
- The site links to Instagram, Facebook, YouTube, Google, and TripAdvisor profiles that can be compared with independently sourced business information.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the site presents a coherent local-restaurant identity, the confirmed external security contradictions dominate the assessment and prevent the website from being treated as trustworthy for credentials, financial activity, or other high-impact actions.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses are Cloudflare edge infrastructure rather than an exposed origin address. This reduces direct origin exposure but is only a mitigating technical control; it does not establish that the website or its content is legitimate.

EVIDENCE

- Infrastructure resolution identified four Cloudflare edge addresses, with 0 likely origin addresses observed.
- The hosting organization is CLOUDFLARENET - Cloudflare, Inc., US, on AS13335.

Closing Assessment

Sensitive actions should remain suspended unless independent business confirmation and transaction validation resolve the discrepancy between the site's presentation and the external security warnings.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100

Identity verification confidence	78%
----------------------------------	-----

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of churrascariameinhaus.com.br.

- The request stayed on churrascariameinhaus.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-04. CLEAR
- The earliest public archive of this site is from 2008-06-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about churrascariameinhaus.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
