

Is ciagenesis.com.br a scam? TrustSniffer's high-risk assessment: 0/100

ciagenesis.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

ciagenesis.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A short maintenance page for Genesis Telecomunicacoes LTDA (Cia Genesis) stating the site is under maintenance and providing phone numbers, a fax/messenger number and an email for contact; promises to return soon.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

Site em manutenção

What ciagenesis.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a corporate telecommunications landing page for Genesis Telecomunicacoes LTDA, also presented as Cia Genesis. Its homepage states that the site is under maintenance, provides telephone and fax/messenger contact details, and says the service will return soon; no visible transaction, login, or monetization function is presented.

Scam/Impersonation Risk

The site presents a low-complexity maintenance page without visible phishing forms, credential collection, financial solicitation, or brand-impersonation indicators. However, this benign page-level presentation is materially outweighed by confirmed external threat signals: the domain is listed on external blacklist sources and was classified as malicious by 17 evaluated detections, including Fortinet and Sophos. These are direct contradictions to treating the domain as suitable for sensitive interaction. No identity contradiction between legal entities was observed, but the external detections establish a critical security concern independent of the page's limited content.

EVIDENCE

- The homepage is a maintenance page containing only the Genesis Telecomunicacoes LTDA / Cia Genesis name, contact details, and a return-soon message.
- External reputation evaluation recorded 17 malicious detections, with Fortinet and Sophos among the flagged vendors.
- The domain was marked as present on external blacklist sources; Google Safe Browsing was not malicious in the supplied results.

Regulatory Verification Notes

The apparent business identity is stated on the homepage as Genesis Telecomunicacoes LTDA, also using the Cia Genesis designation, but independent identity verification is not established by the supplied evidence. The page does not claim a license, identify a licensing authority, or provide a registration number. This is a regulatory-transparency gap rather than, by itself, evidence of fraud. The available historical and technical record shows that the domain is established, but that fact does not resolve the external security contradiction or independently validate the operator.

EVIDENCE

- The domain was registered on 2009-03-03 and is approximately 17.48 years old, with registration expiry on 2030-03-03.
- Historical coverage records 37 archive snapshots spanning 2013–2026, across 14 tracked years.
- The site's hosting resolved to AS31898, operated by ORACLE-BMC-31898 — Oracle Corporation, US.
- The transport certificate is issued by YR2, uses DV validation, and is valid until 2026-11-03T23:16:39+00:00.

What to Verify Next

Before any sensitive interaction, an organisation should independently confirm that the telecommunications entity named on the homepage is the intended operator of the domain through an authoritative corporate or sector registry. Contact details should be validated through an independently sourced corporate record rather than relying solely on the maintenance page. Any security block or blacklist warning should be investigated with the organisation's security team, and the domain should not be approved for credentials, account access, or financial workflows until the external detections have been resolved and independently explained.

EVIDENCE

- The homepage contains no login form, password field, payment function, or external submission form.
- The page provides a corporate name and contact channels but no licensing authority or registration number.
- The external evaluation recorded a confirmed blacklist condition requiring resolution before sensitive-use approval.

Summary Verdict

The overall posture is critical, with sensitive interaction risk driven by confirmed external malicious and blacklist signals. The site's simple corporate presentation and established registration history do not provide sufficient grounds to override those contradictions, and the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to one likely origin IP rather than a detected CDN edge, with no CDN or WAF identified in the supplied infrastructure facts. It is hosted by Oracle Corporation in the United States on AS31898; the valid DV certificate provides transport encryption, but neither the hosting arrangement nor the certificate establishes legitimacy or offsets the external reputation findings.

Closing Assessment

The domain should be treated as unsuitable for login, credential submission, or financial activity unless the external detections are cleared and the operator is independently validated through authoritative channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ciagenesis.com.br.

- The request stayed on ciagenesis.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 126.151, across 2 name servers. NOTED
- The registration is paid up to 2030-03-03. CLEAR
- The earliest public archive of this site is from 2013-03-31. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ciagenesis.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
